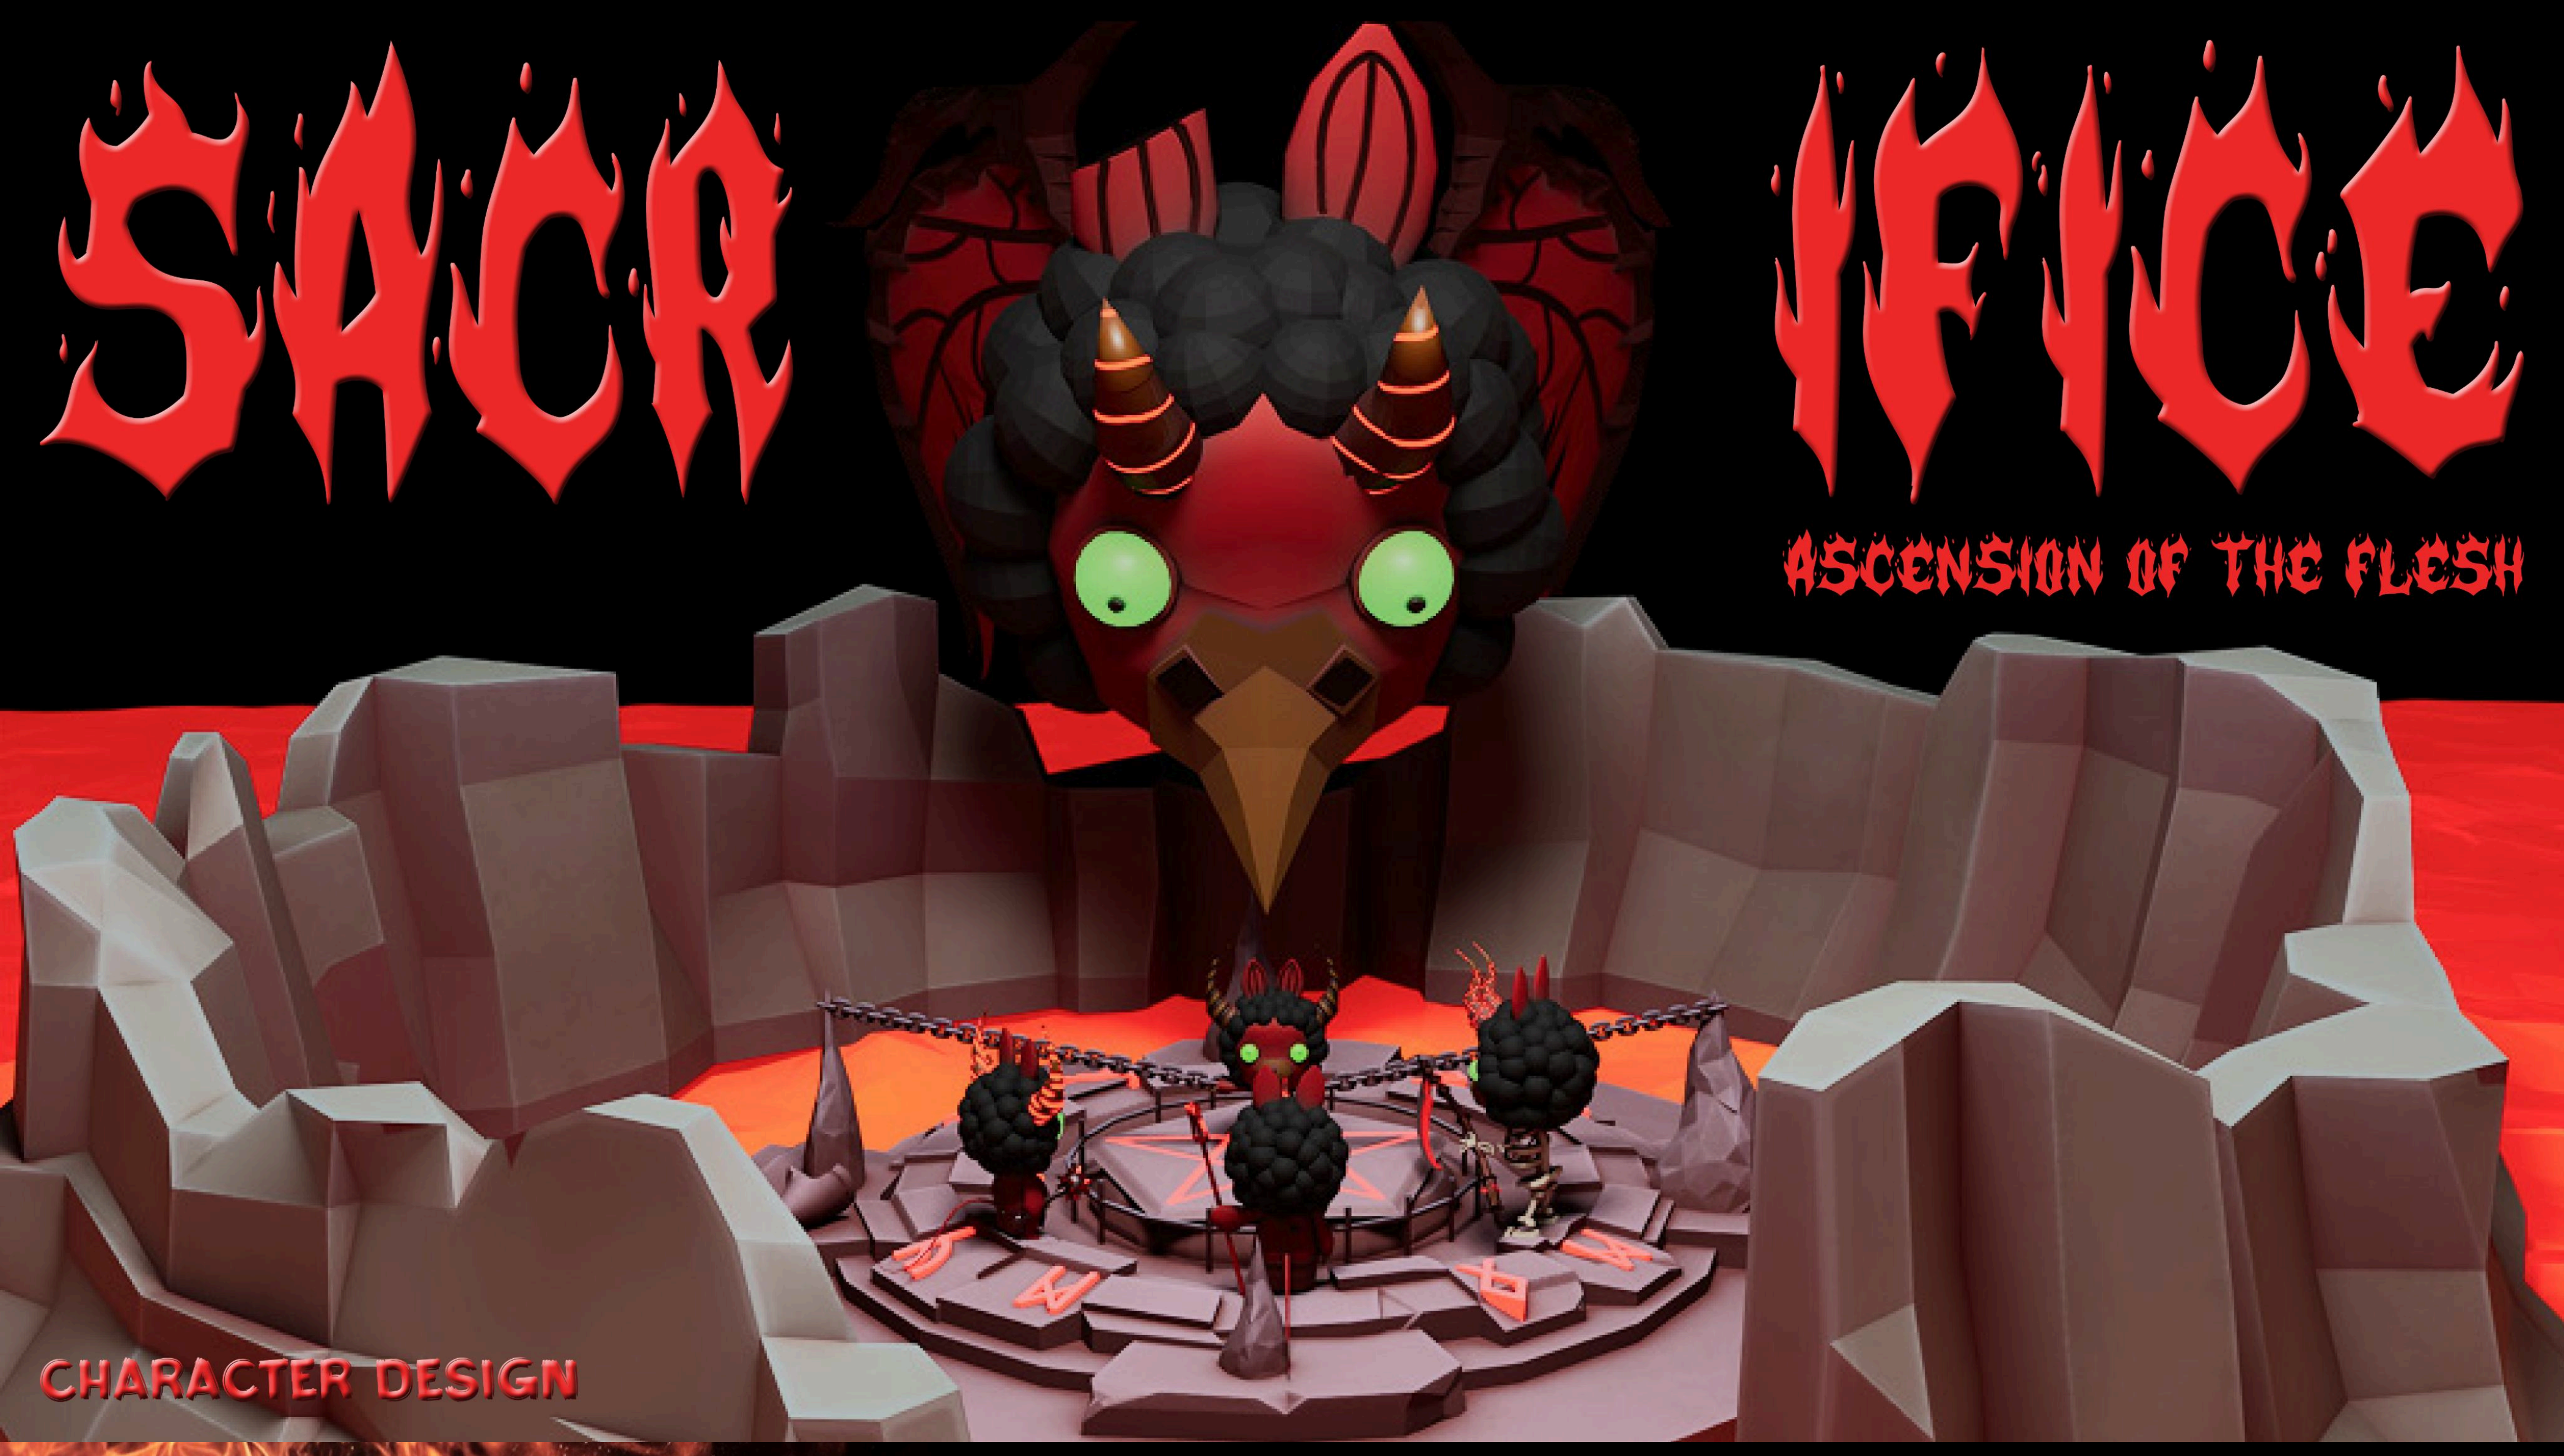
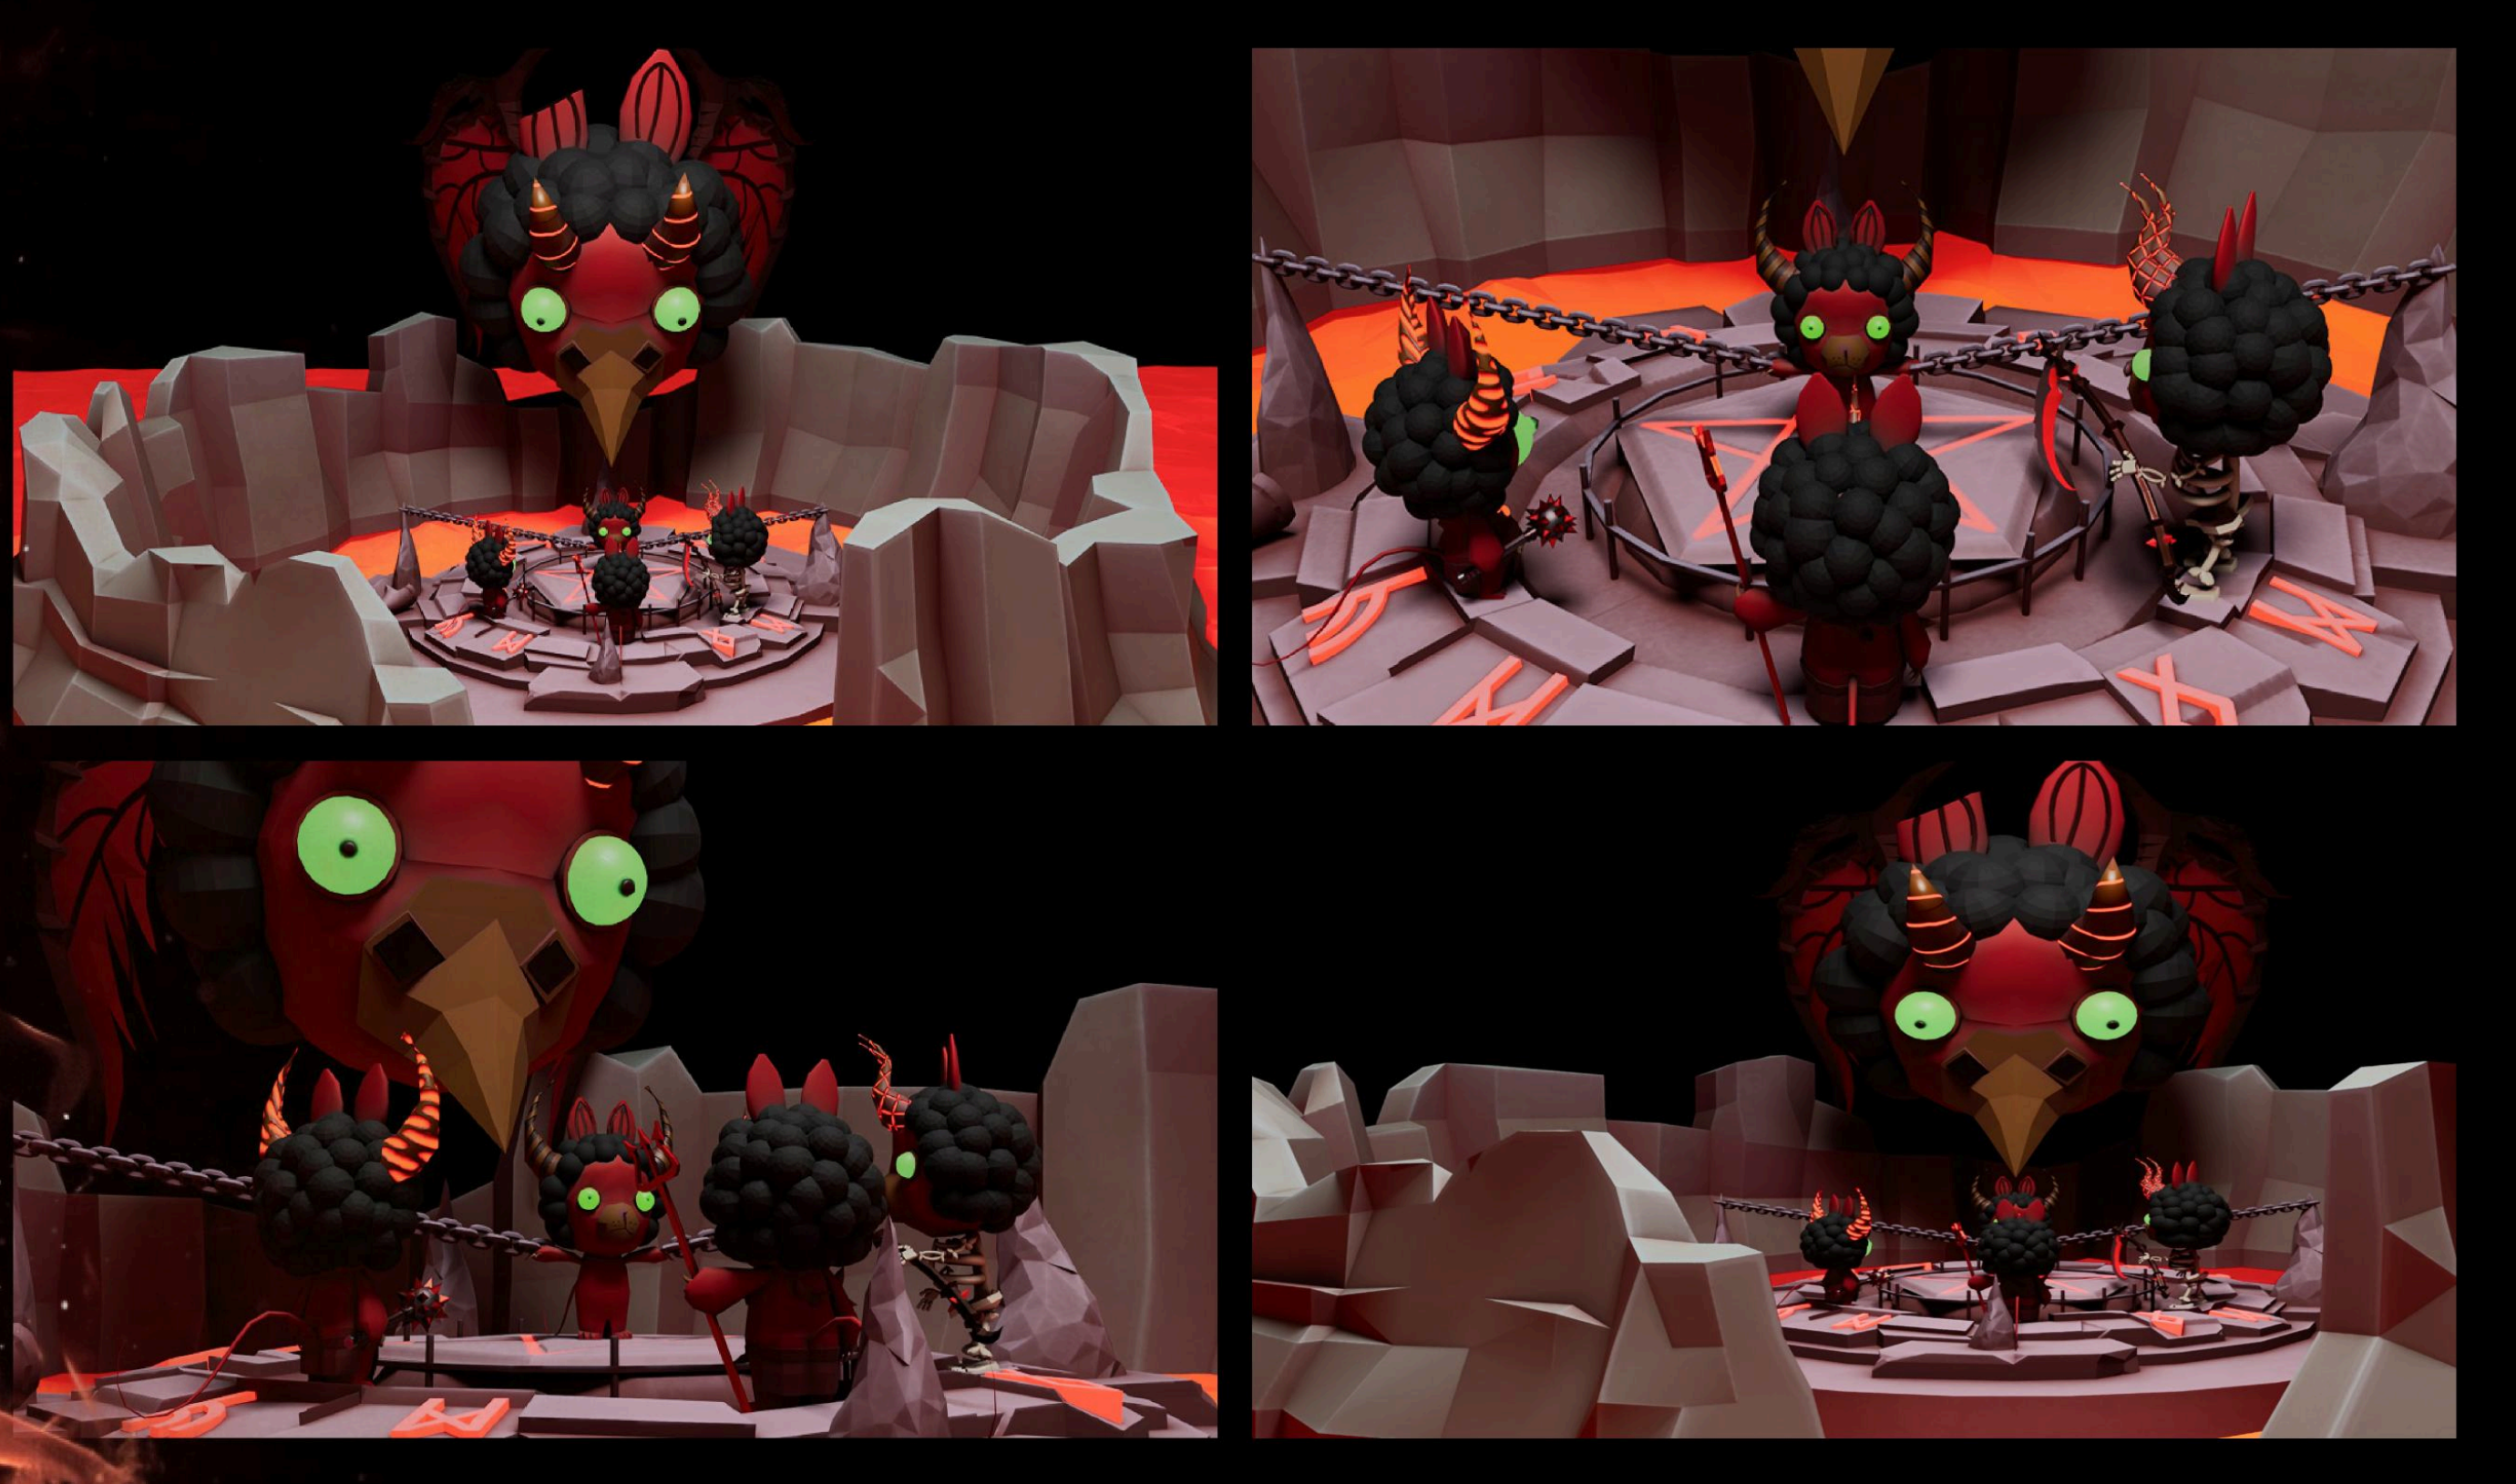
SACR IFICE

ASCENSION OF THE FLESH



CHARACTER DESIGN

STORY OF THE HELLLLL



INSPIRATION

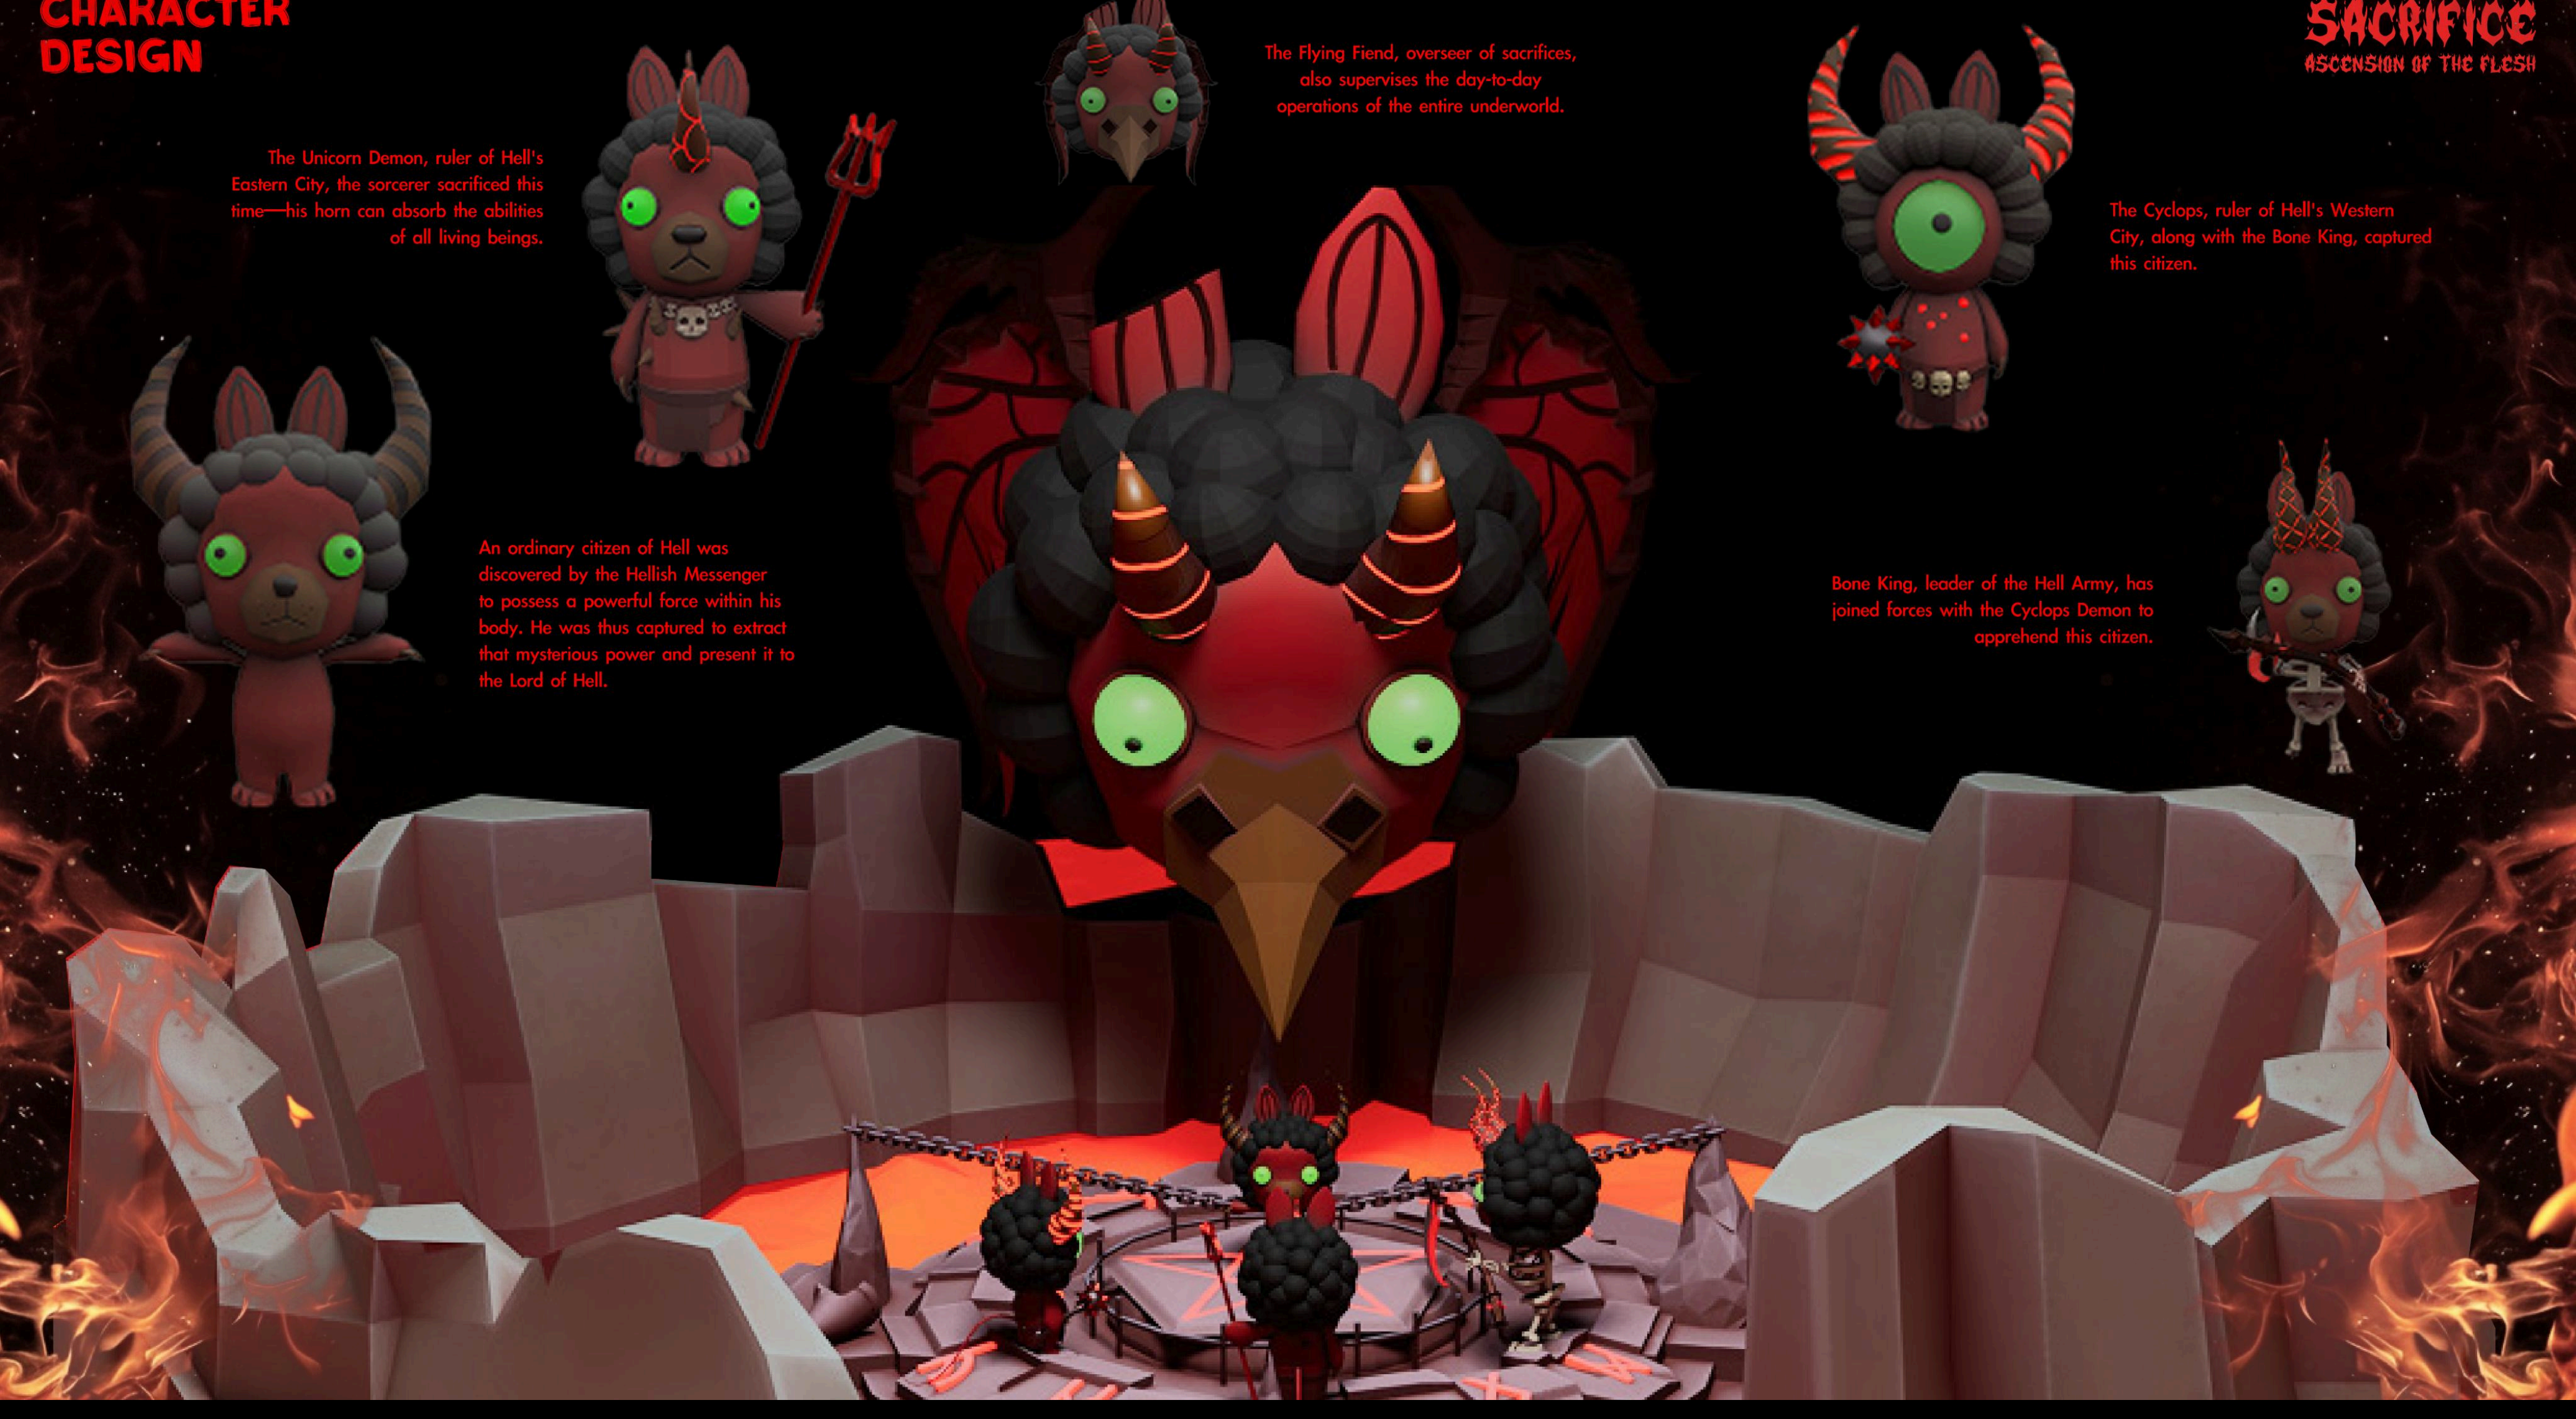
With the recent surge in popularity of the figurine industry, I decided to create some related models. So I searched online for figurines like Labubu and other cartoon-style items, used the reference images, and began my design.

Upon the ancient altar encircled by molten lava, four demons from different abysses—one clad in scale armor dripping magma, another with wings shrouded in shadow, a third pieced together from obsidian, and the fourth in a constantly warping form—simultaneously pressed their claws upon the most inconspicuous demon at the altar's center. As magma erupted violently, the demon's skin cracked inch by inch, unleashing an absolute darkness that devoured light—revealing that this ritual, gathering demon lords from all corners, was but a prelude to welcoming the very essence of the Abyss itself.

CHARACTER DESIGN

SACRIFICE

ASCENSION OF THE FLESH



The Unicorn Demon, ruler of Hell's Eastern City, the sorcerer sacrificed this time—his horn can absorb the abilities of all living beings.

The Flying Fiend, overseer of sacrifices, also supervises the day-to-day operations of the entire underworld.

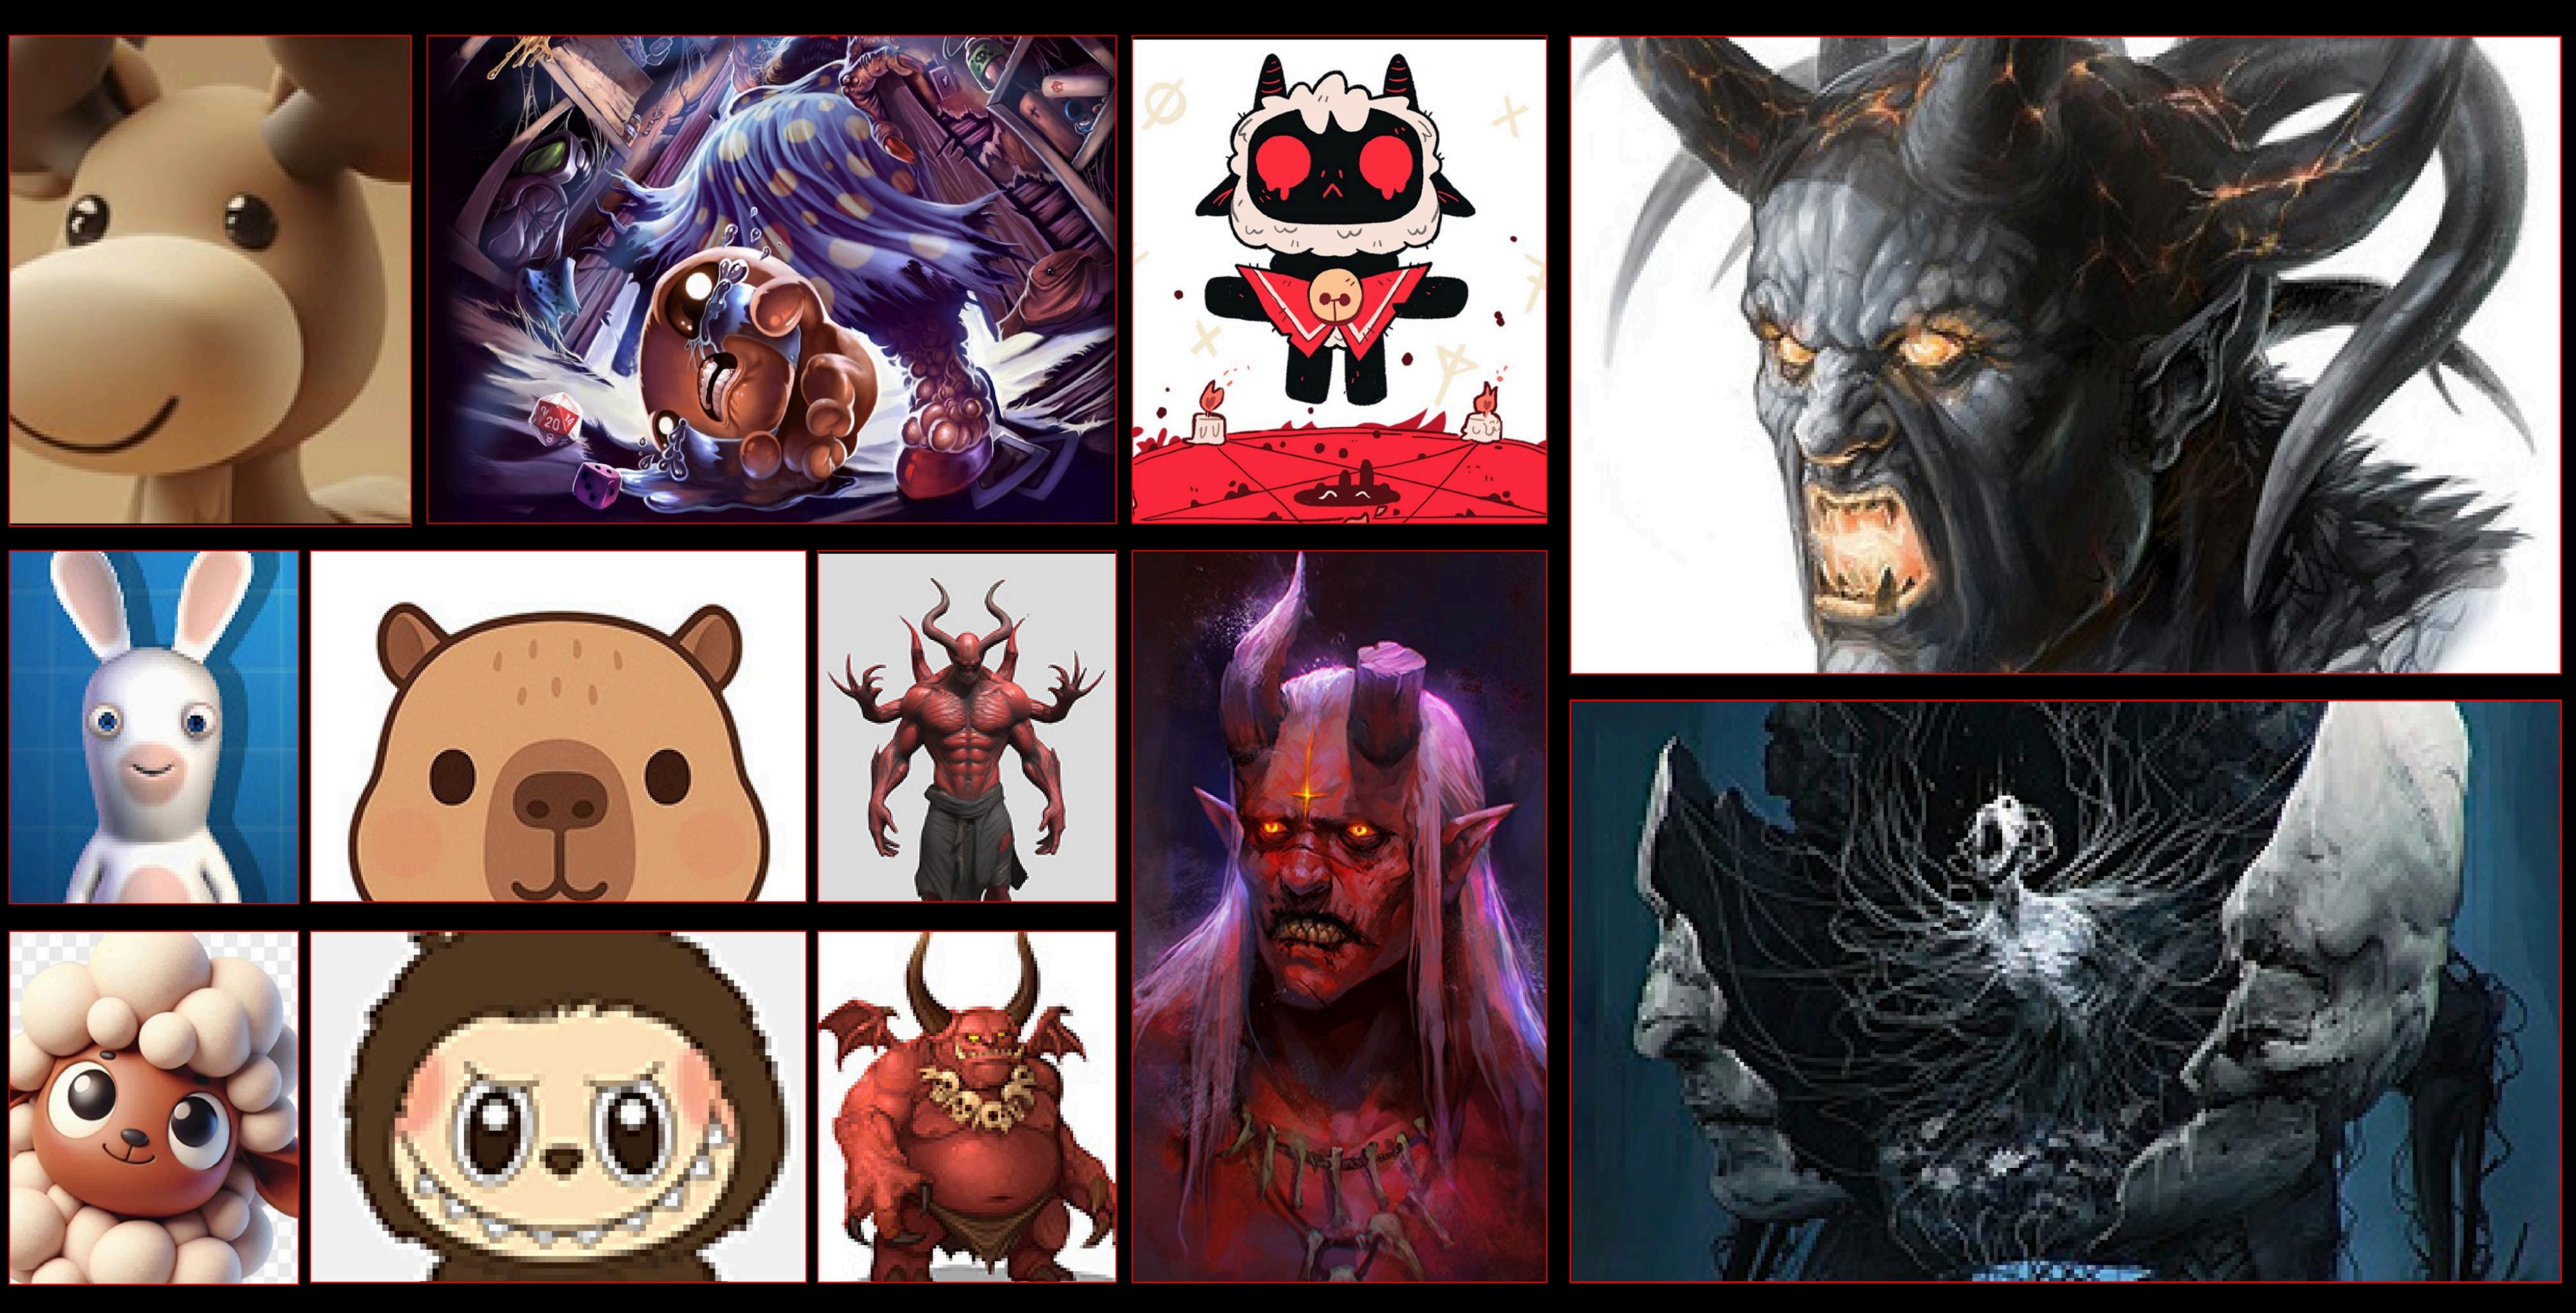
The Cyclops, ruler of Hell's Western City, along with the Bone King, captured this citizen.

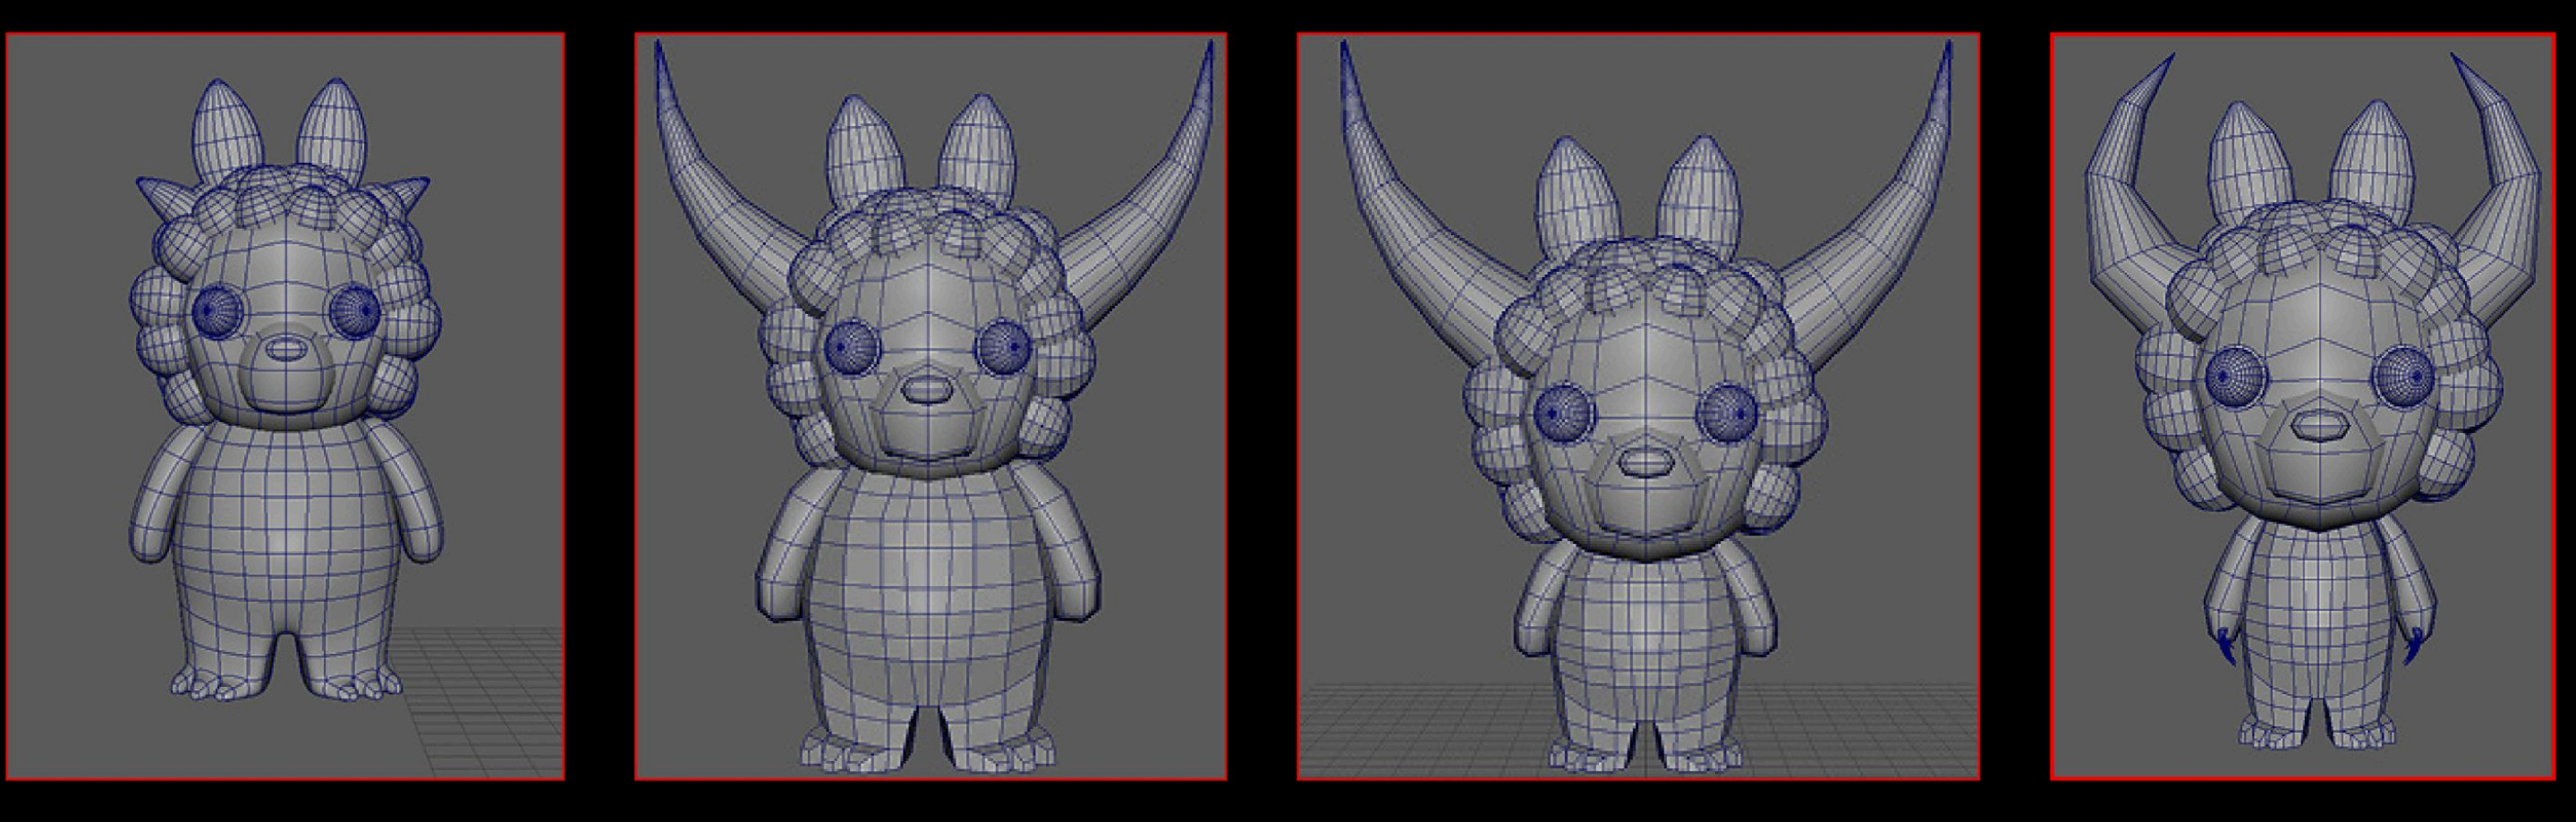
An ordinary citizen of Hell was discovered by the Hellish Messenger to possess a powerful force within his body. He was thus captured to extract that mysterious power and present it to the Lord of Hell.

Bone King, leader of the Hell Army, has joined forces with the Cyclops Demon to apprehend this citizen.

MOODBOARD

GENERAL ENVIRONMENTAL REFERENCES

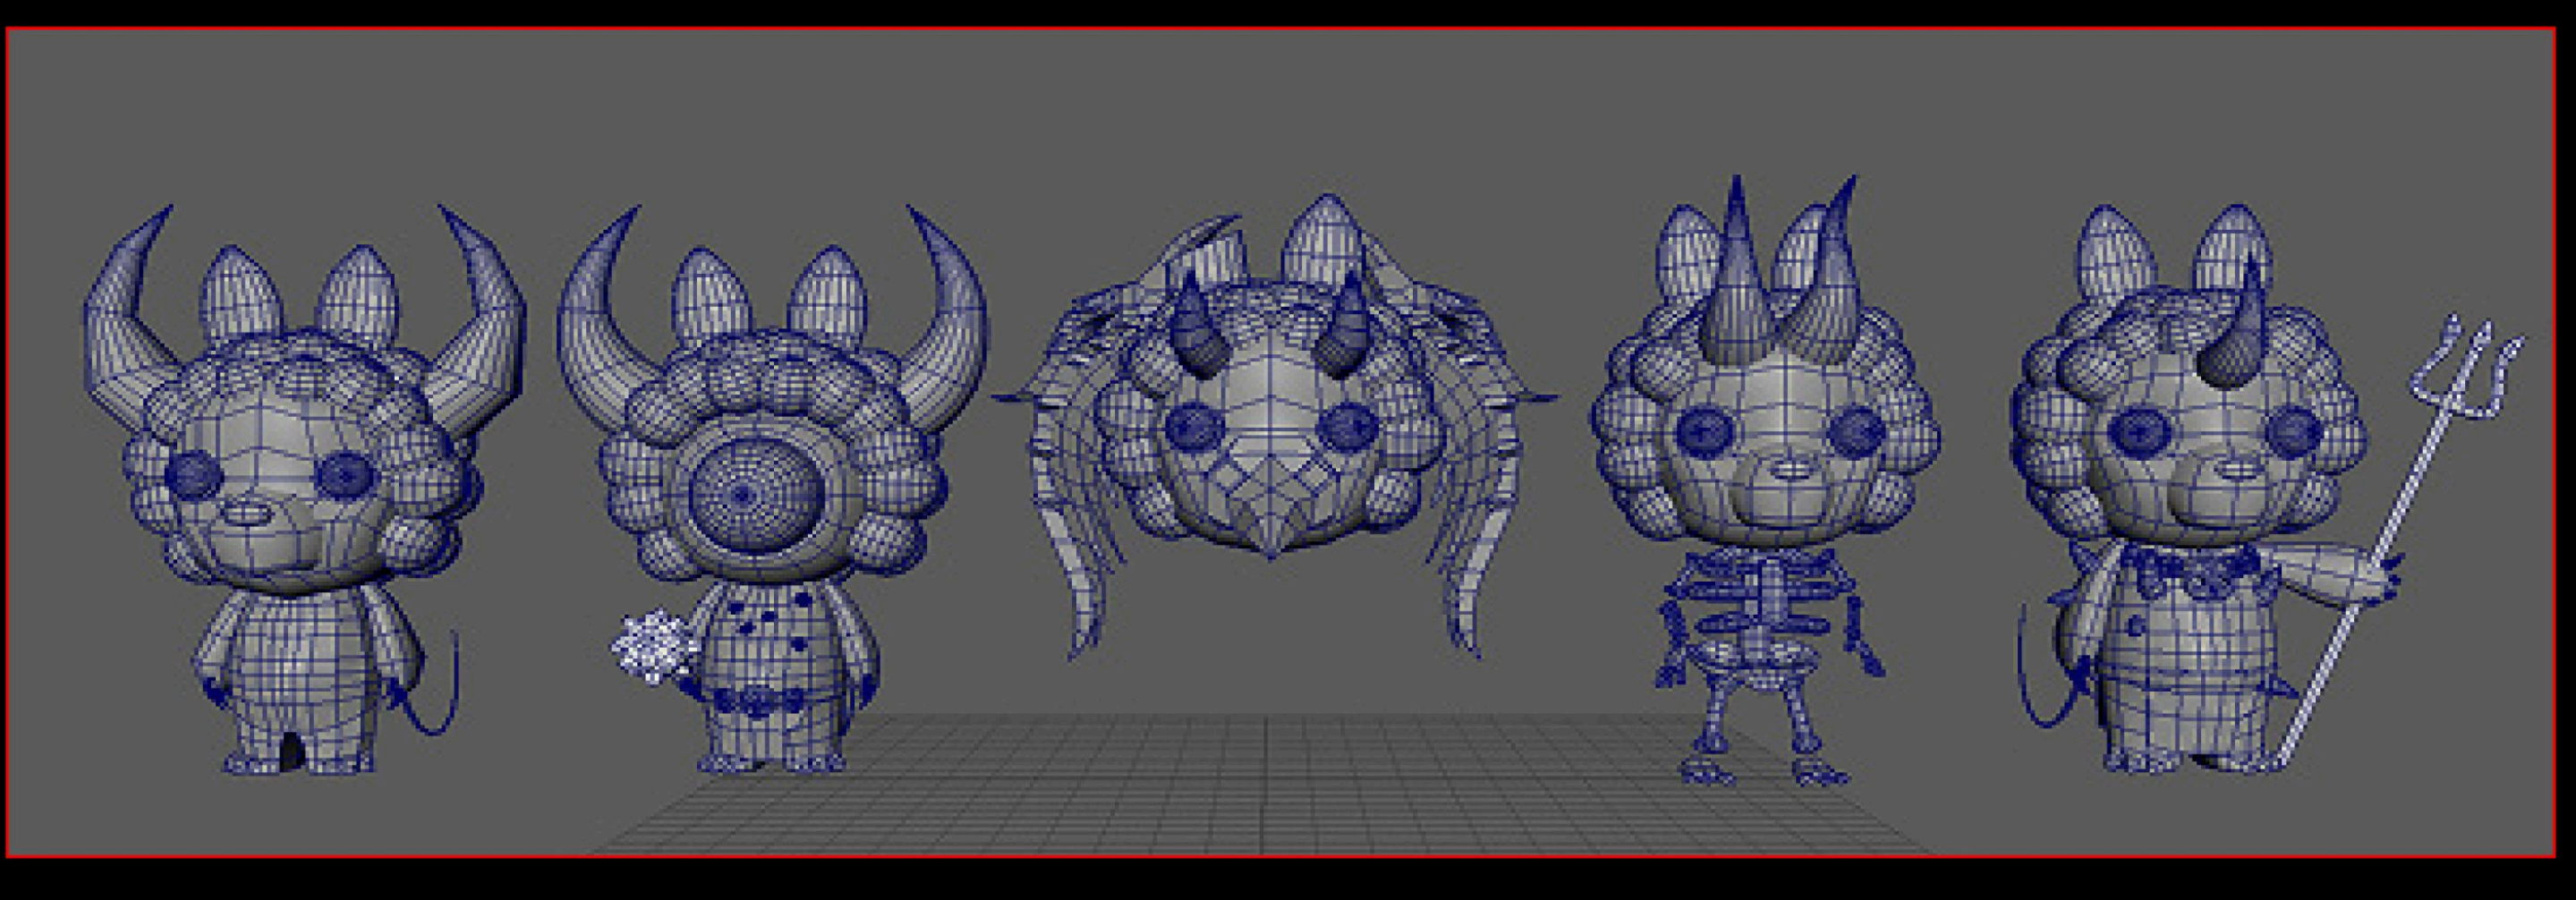


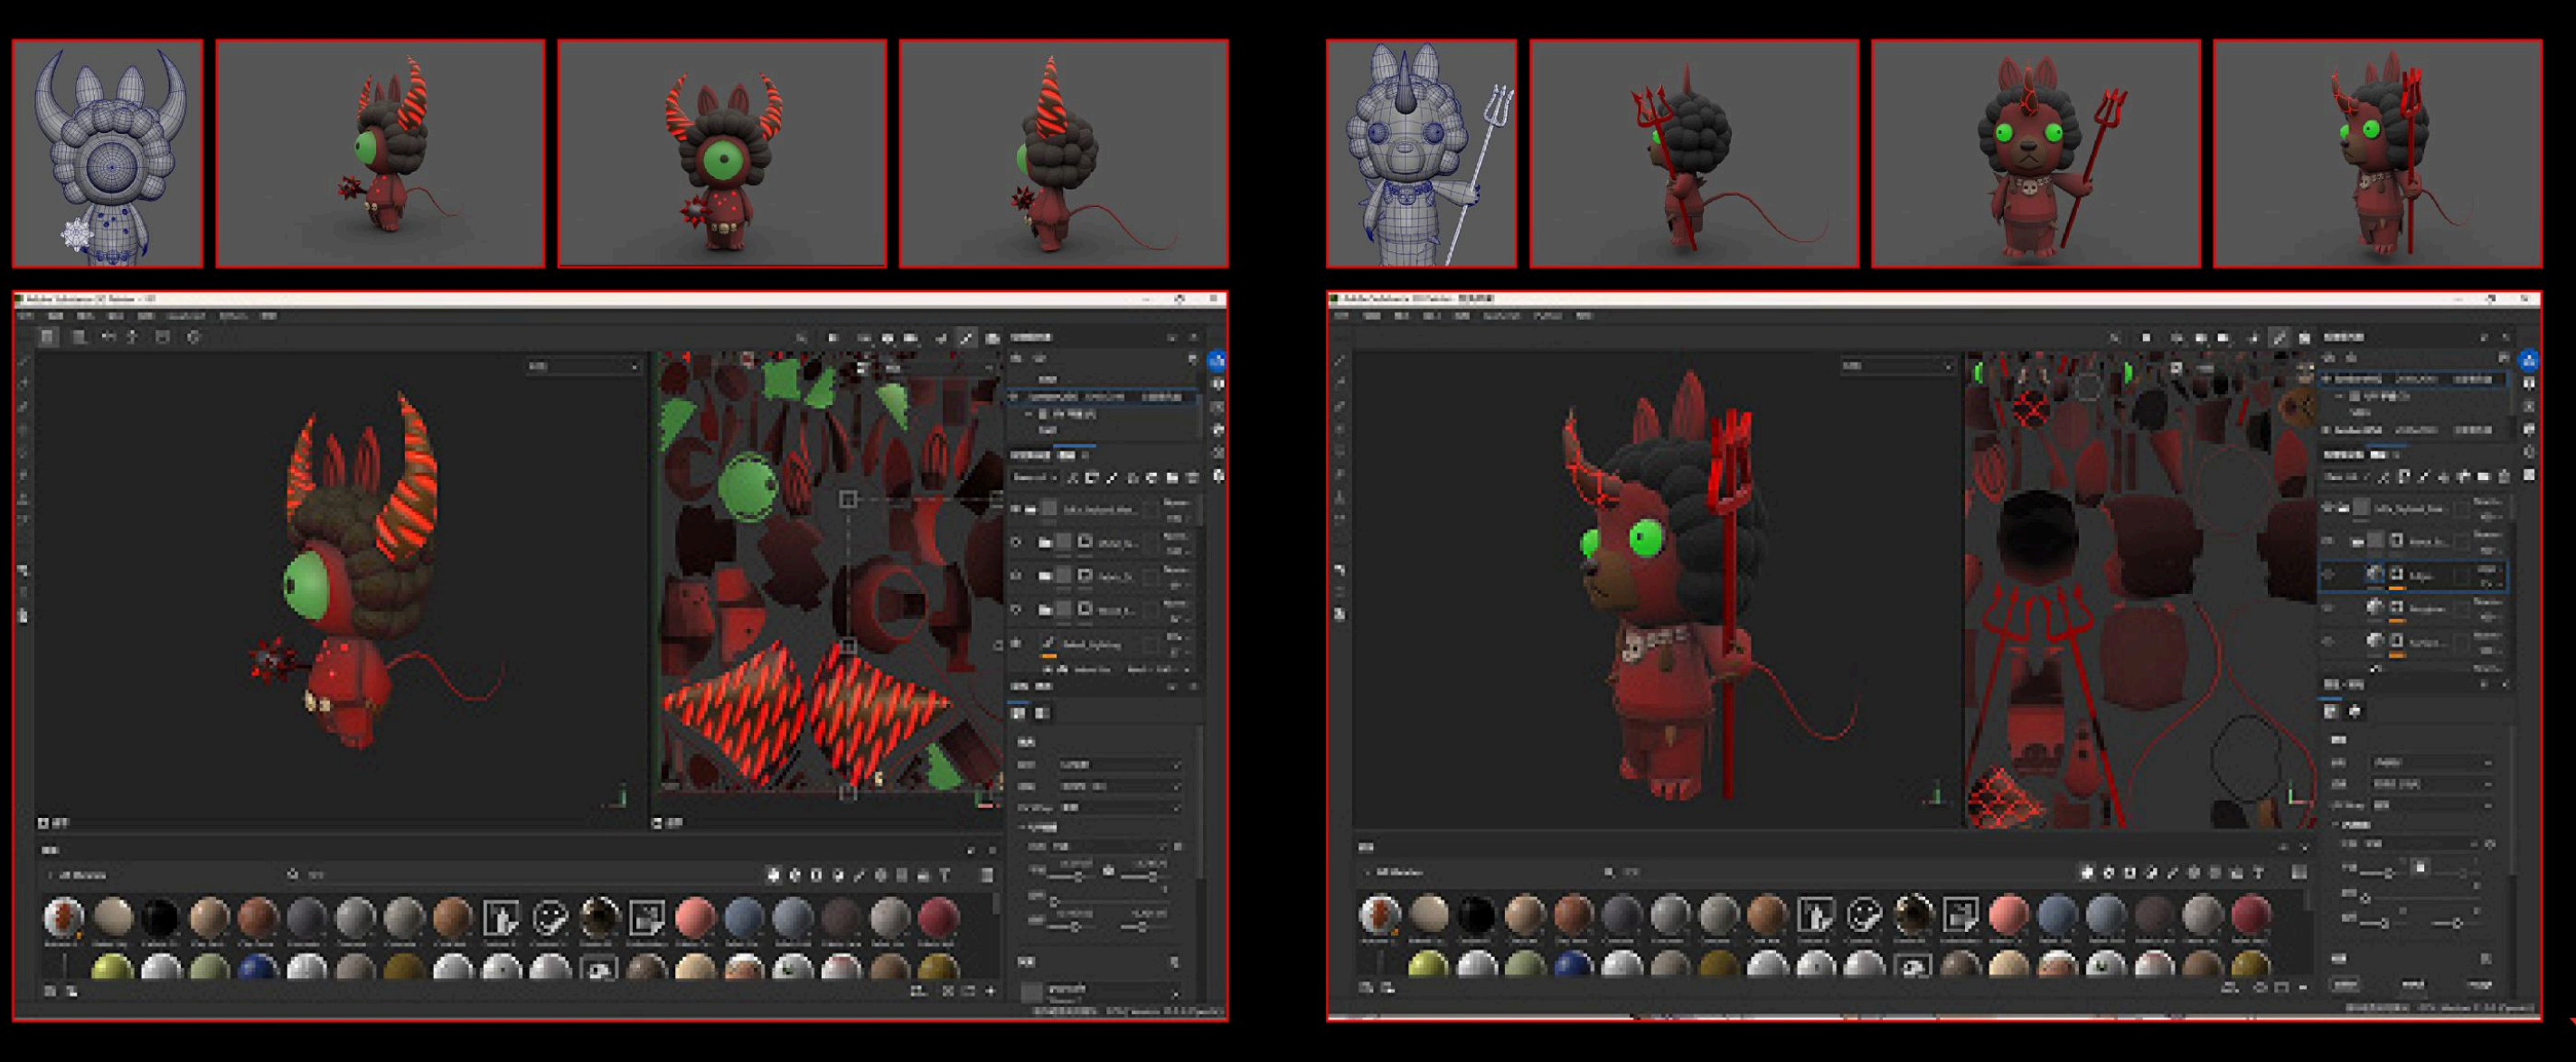


VERSION

MODELING PROCESS

This is the character model I designed at the very beginning.

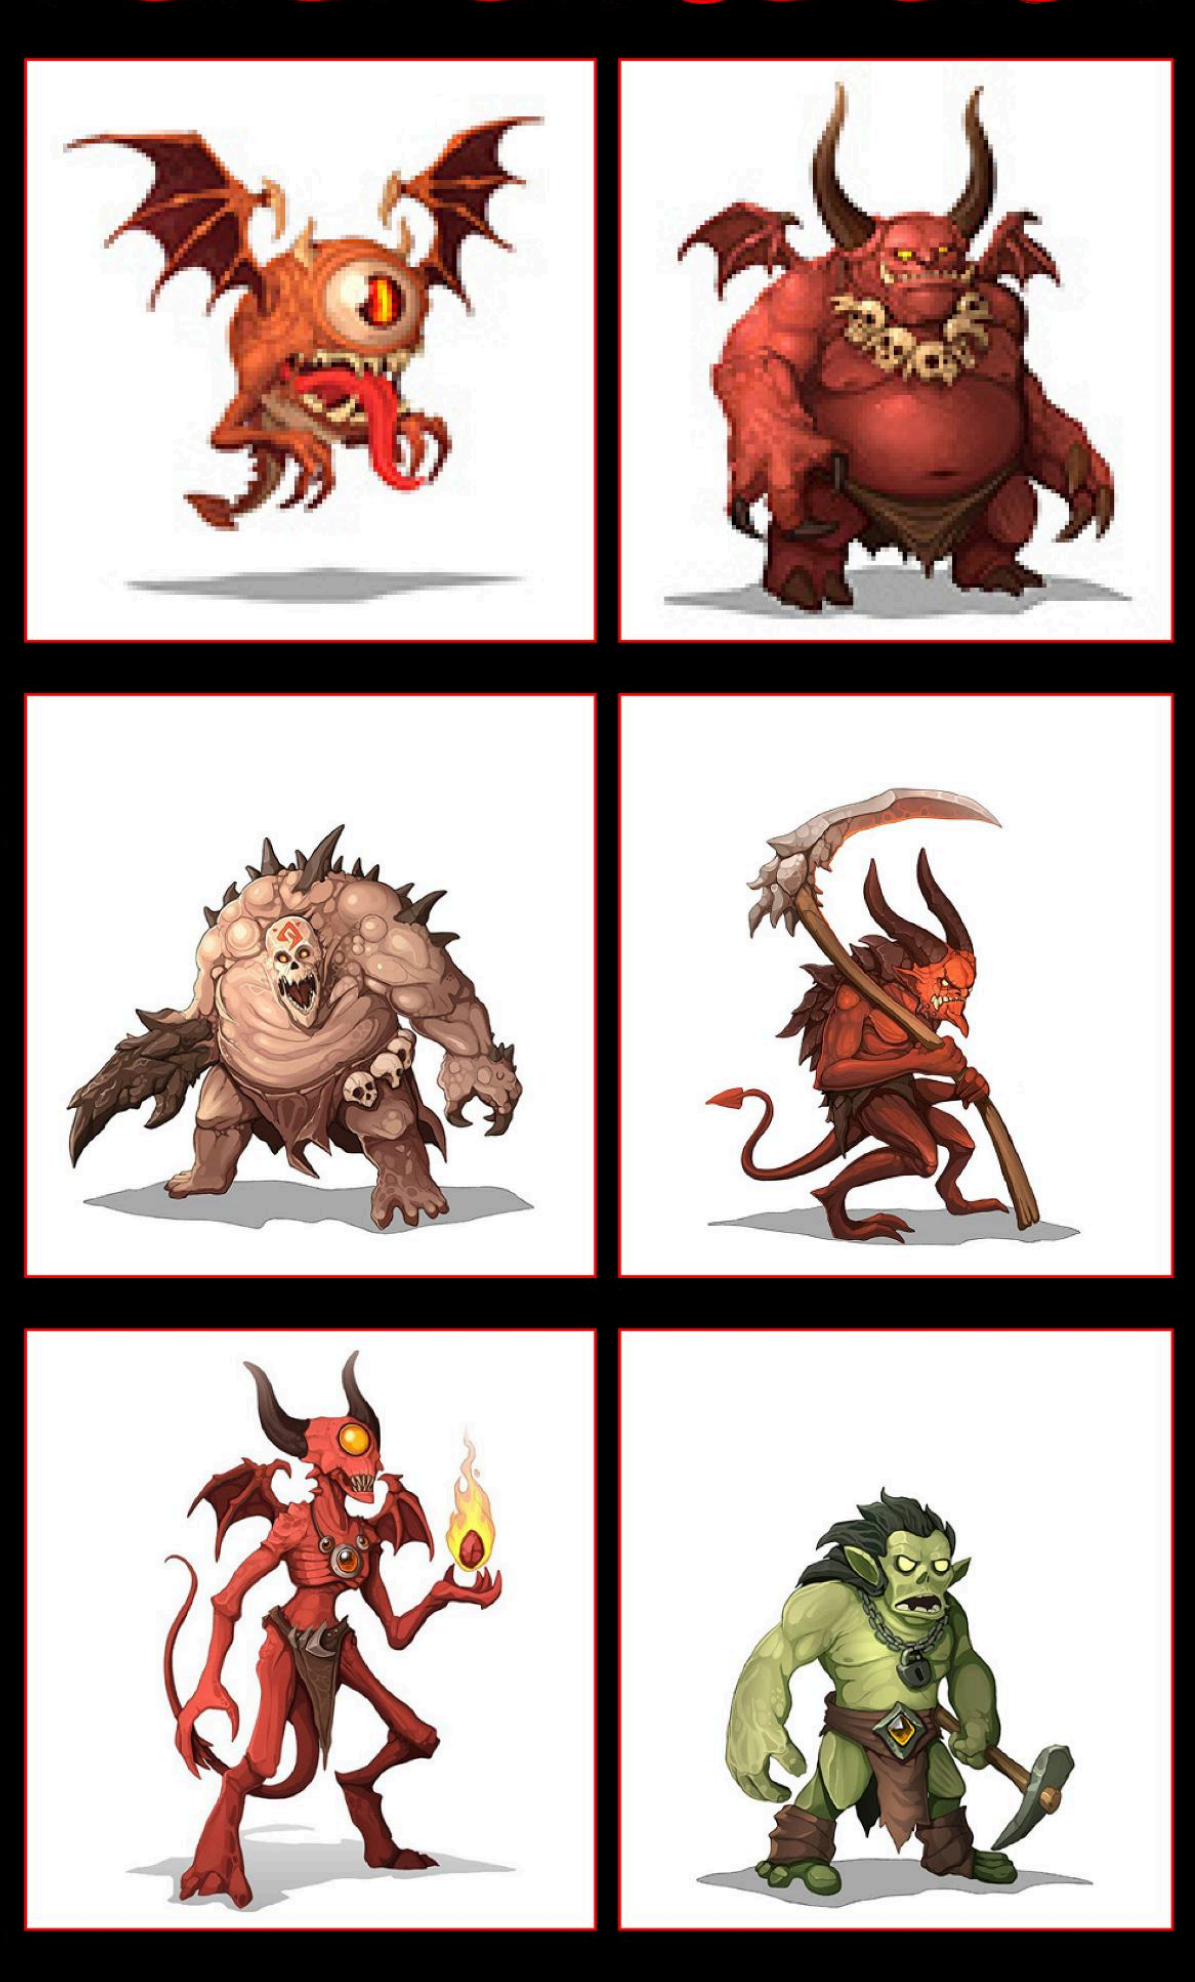


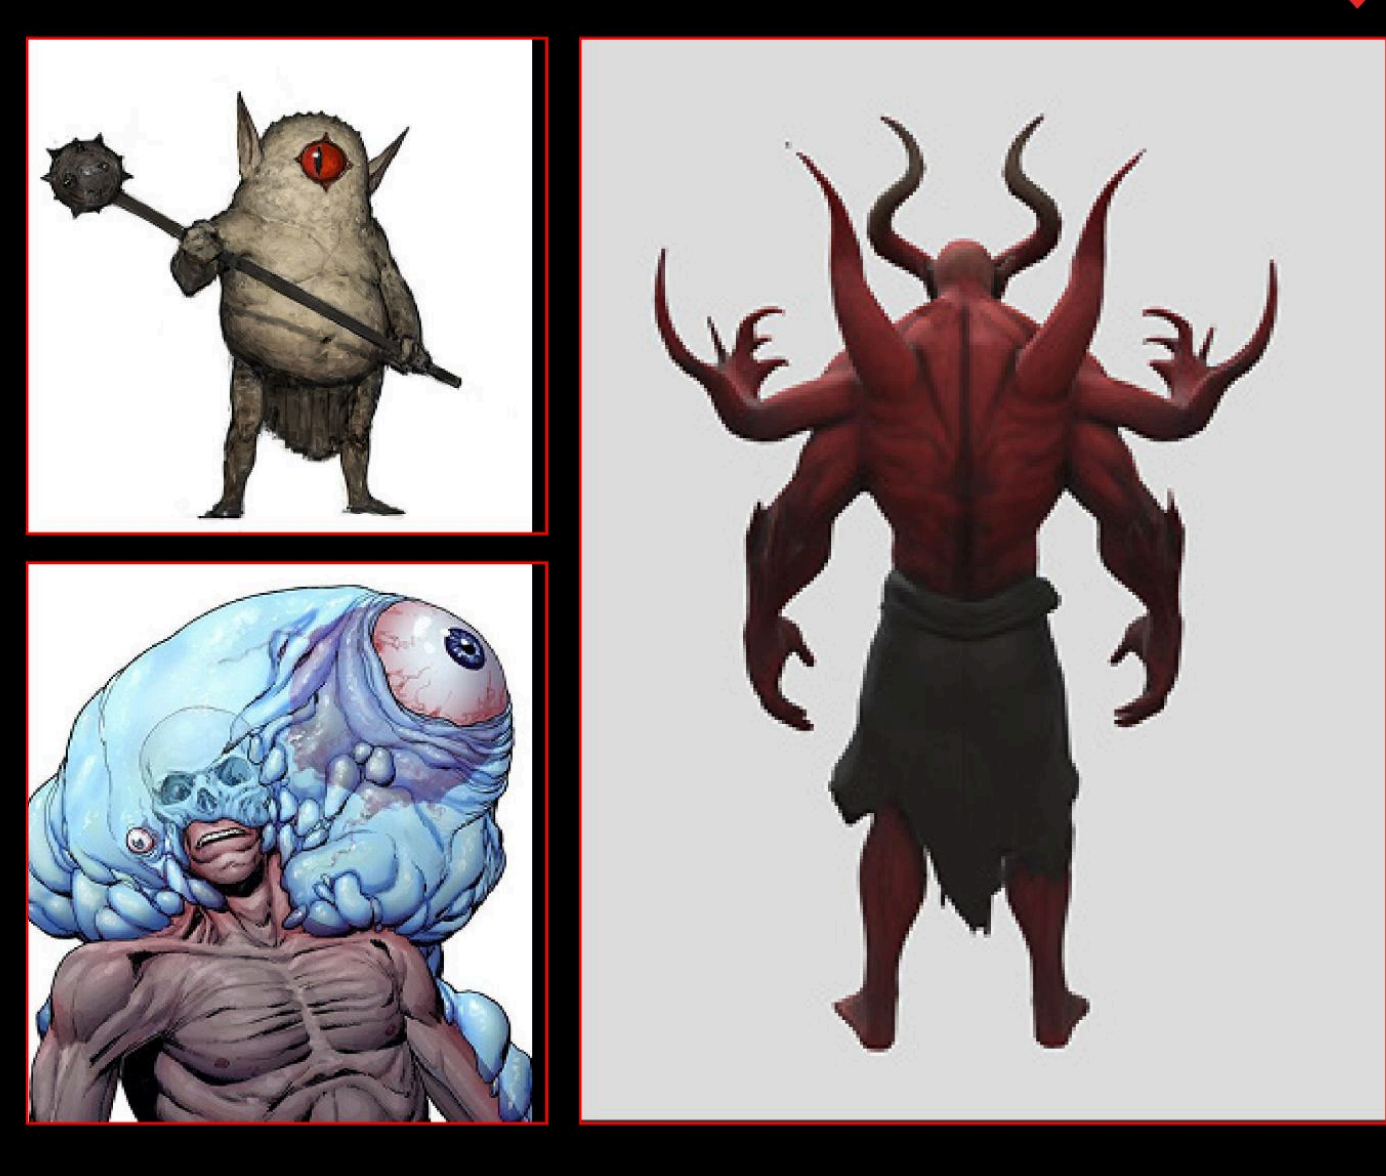


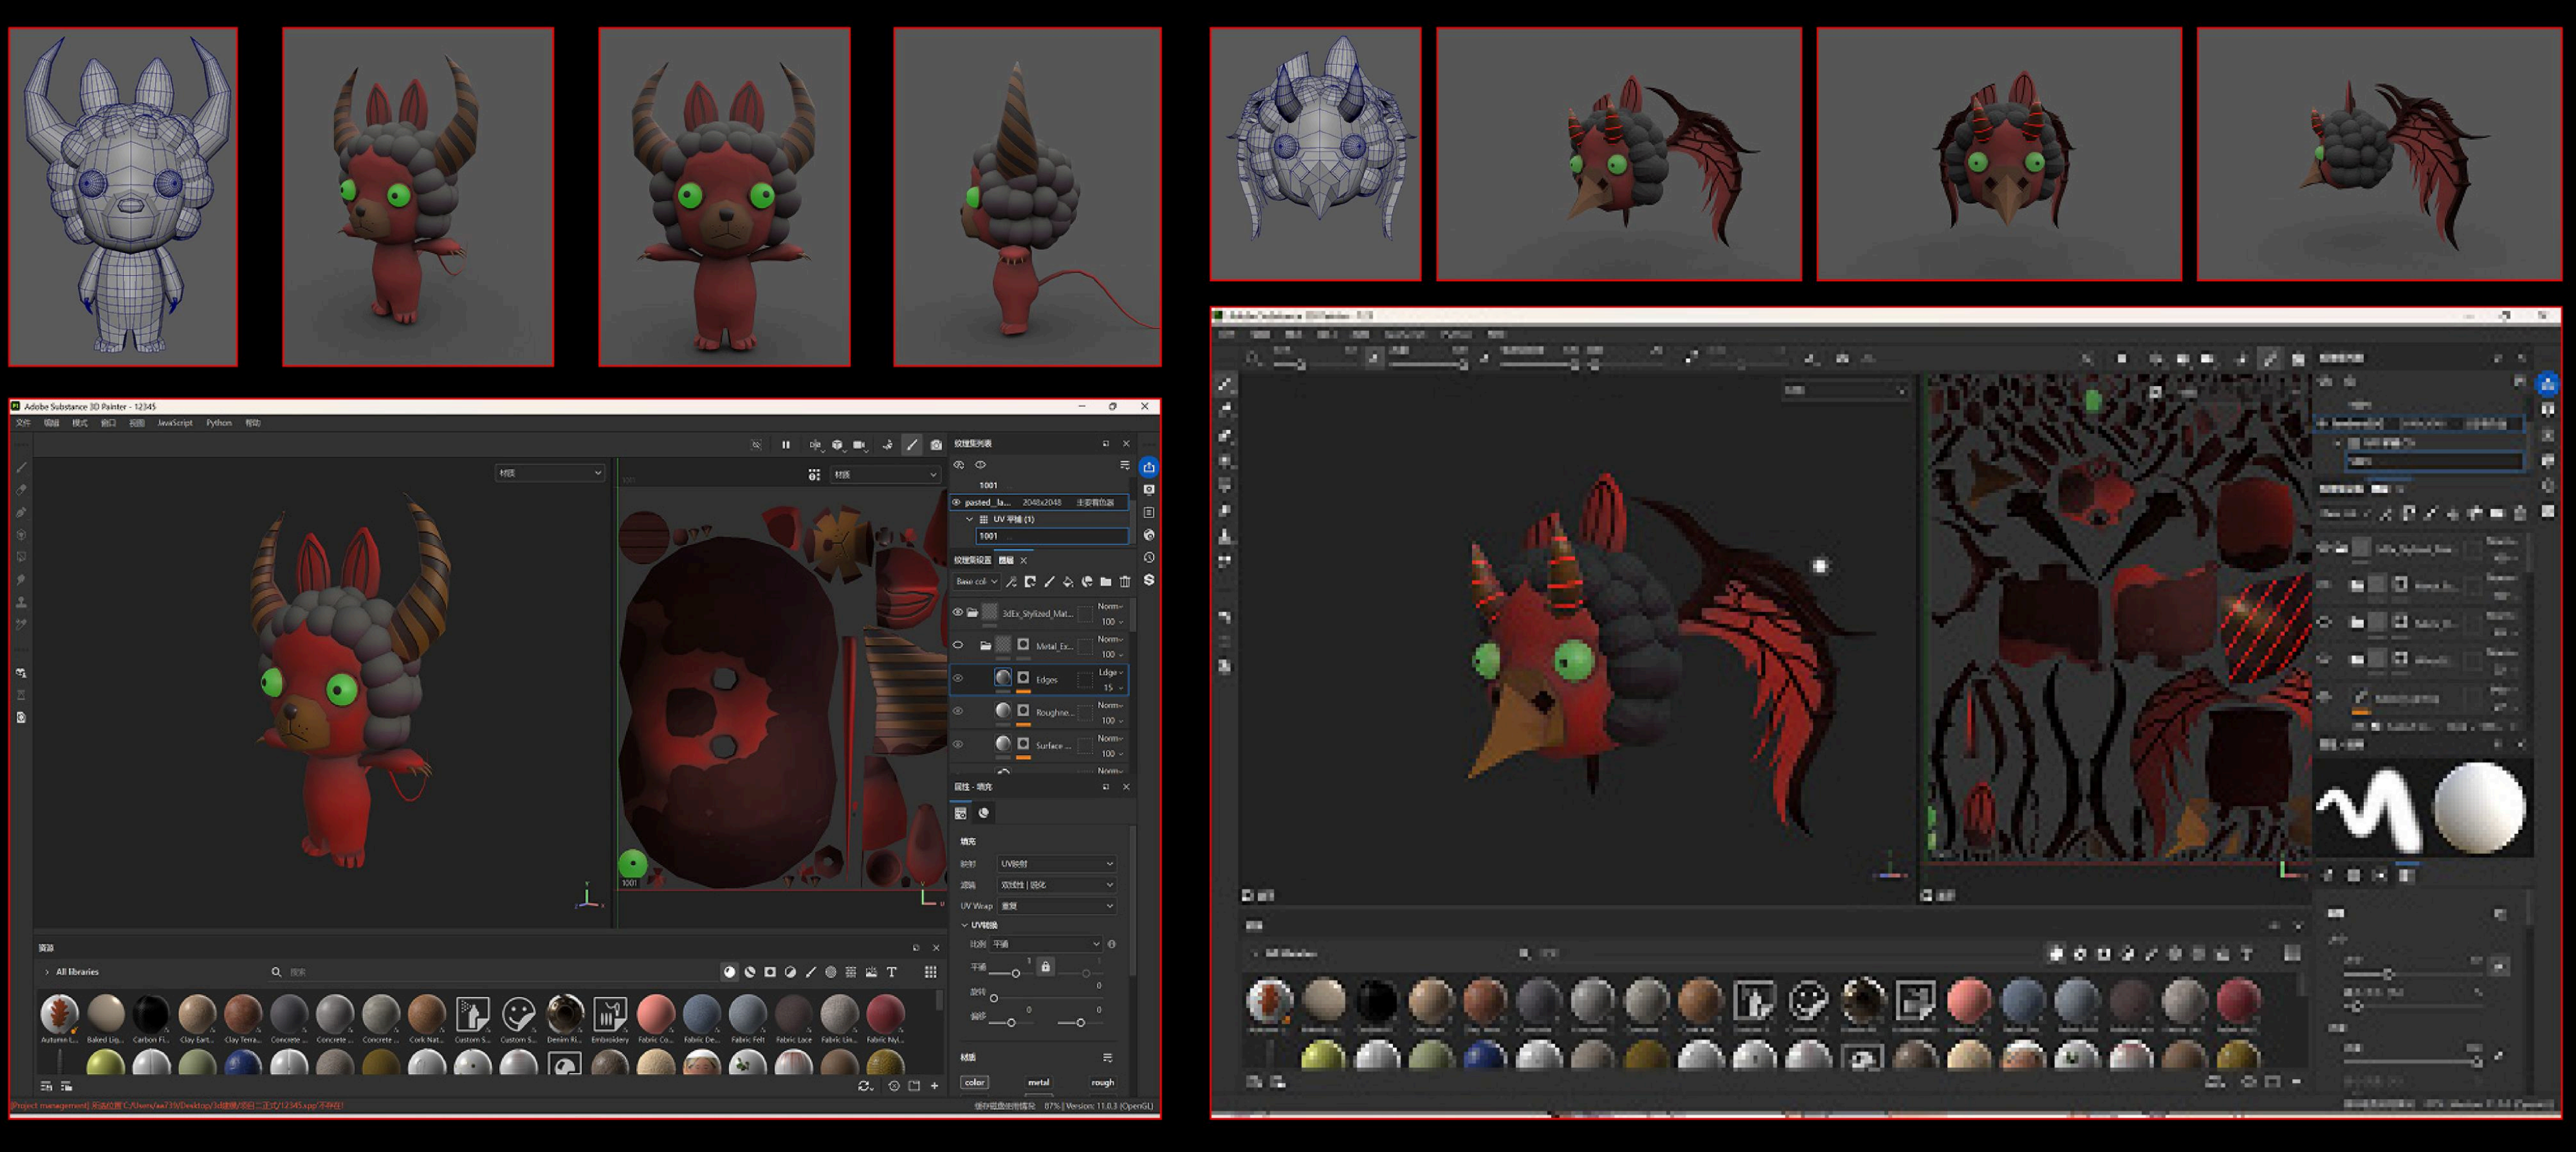
CHARACTER REFERENCE LIST

SACRIFICE

ASCENSION OF THE FLESH





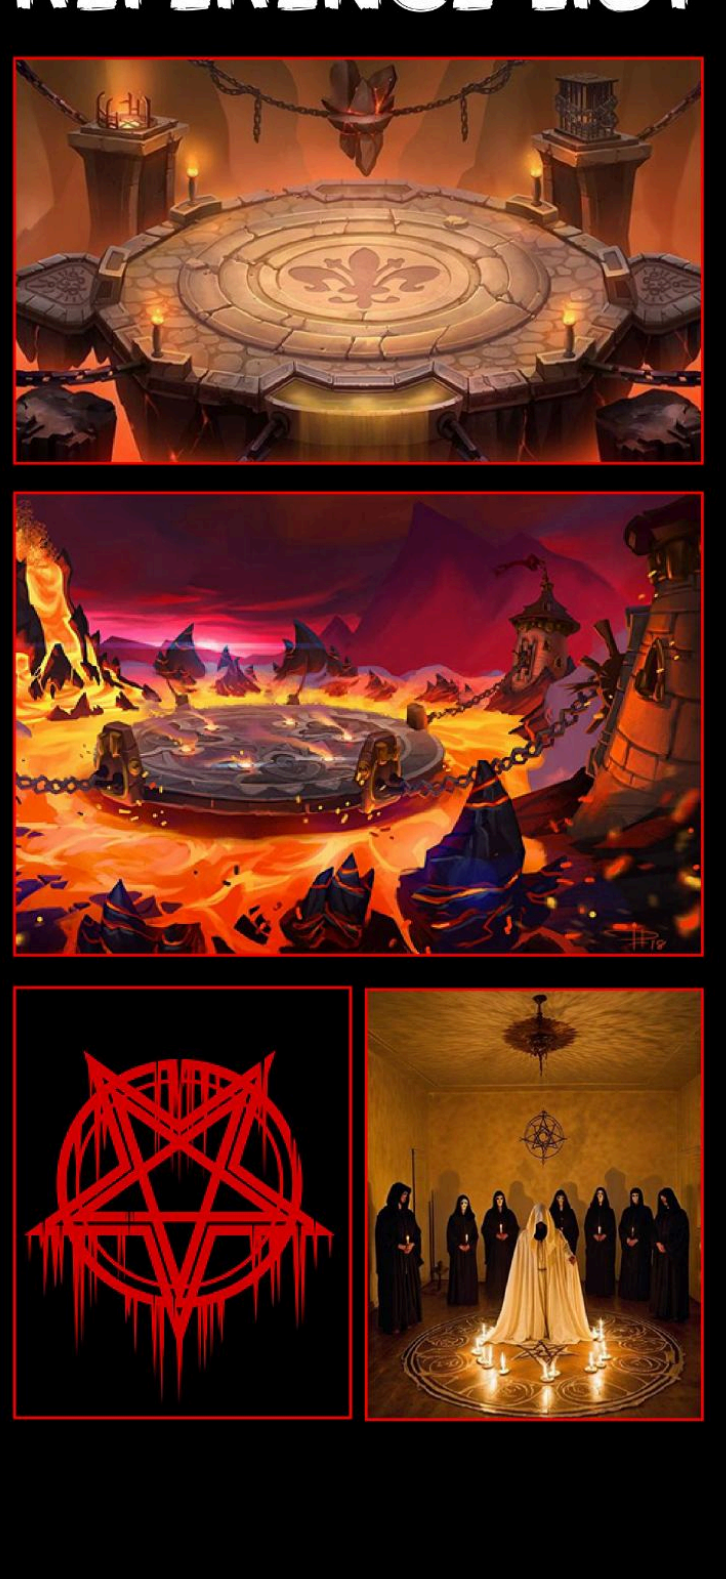


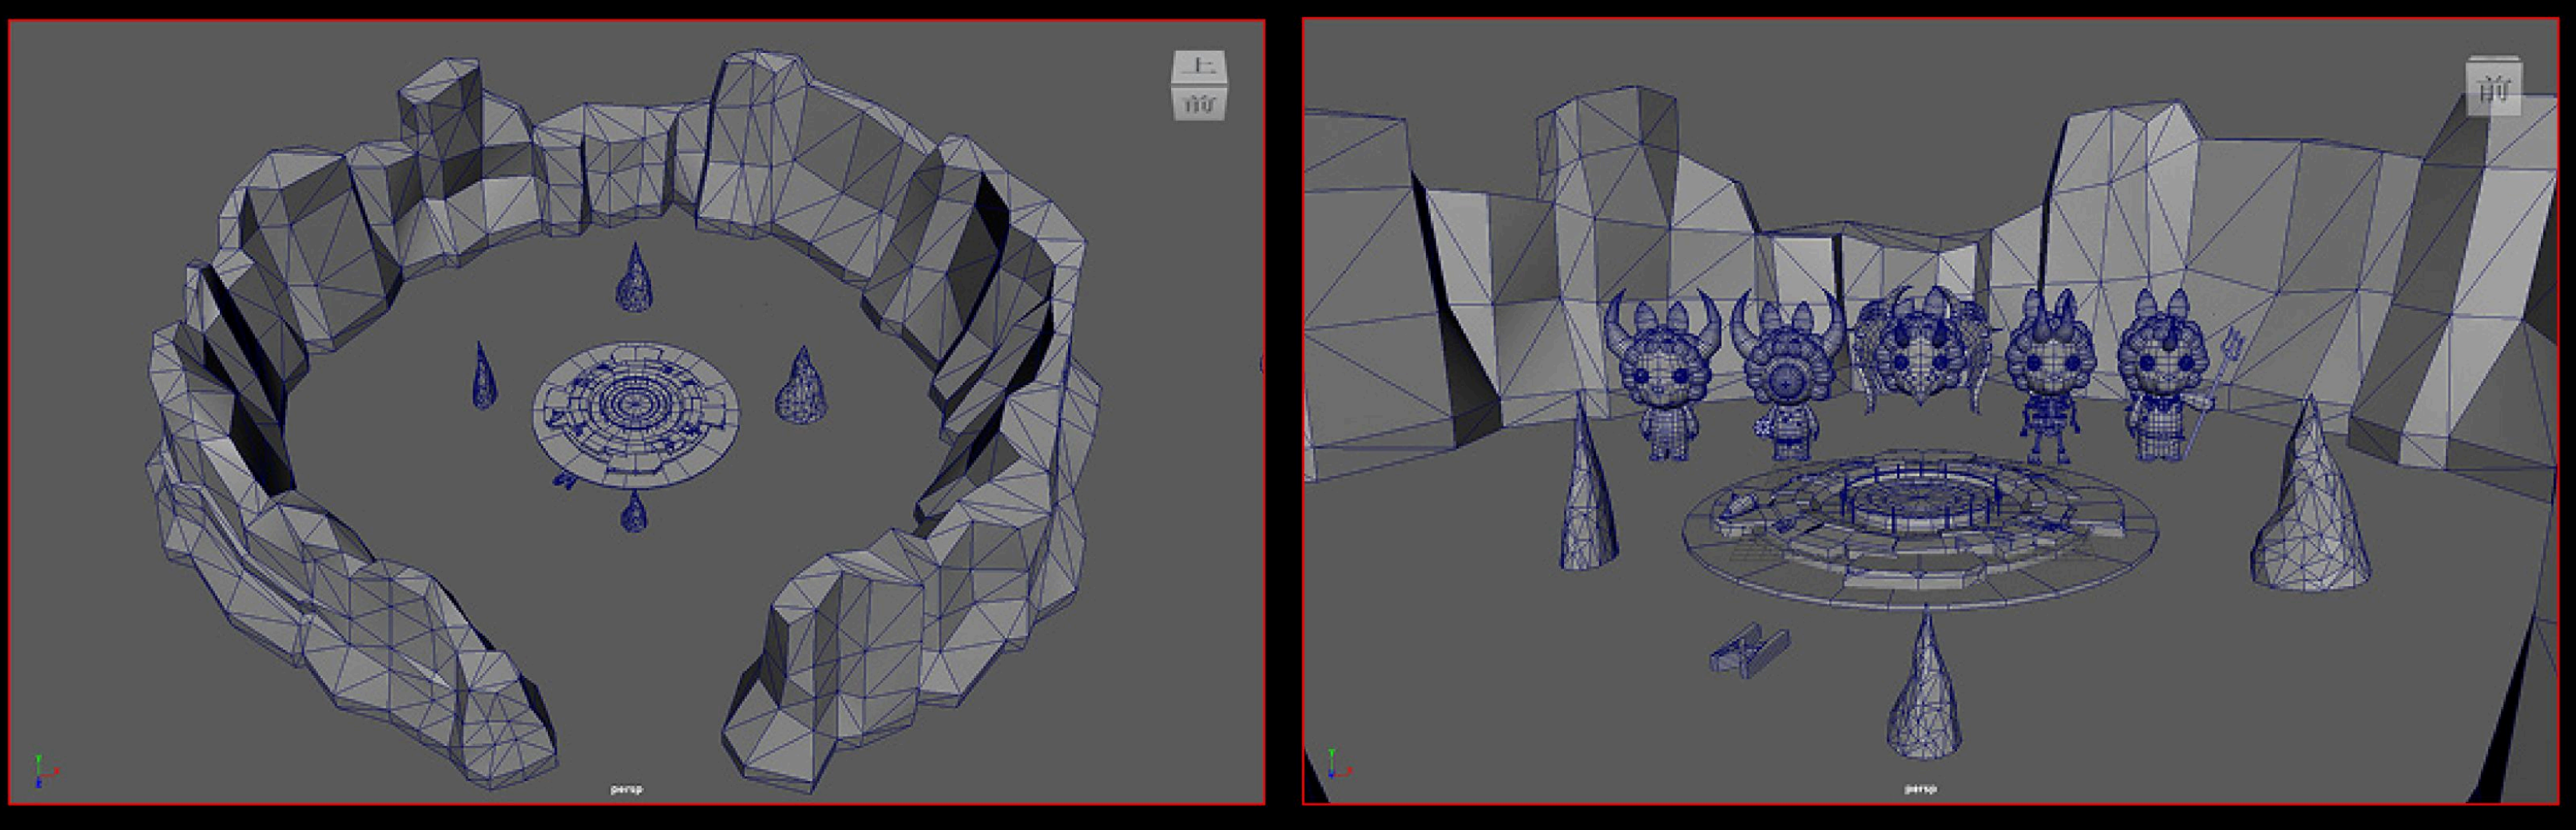
FINAL VERSION

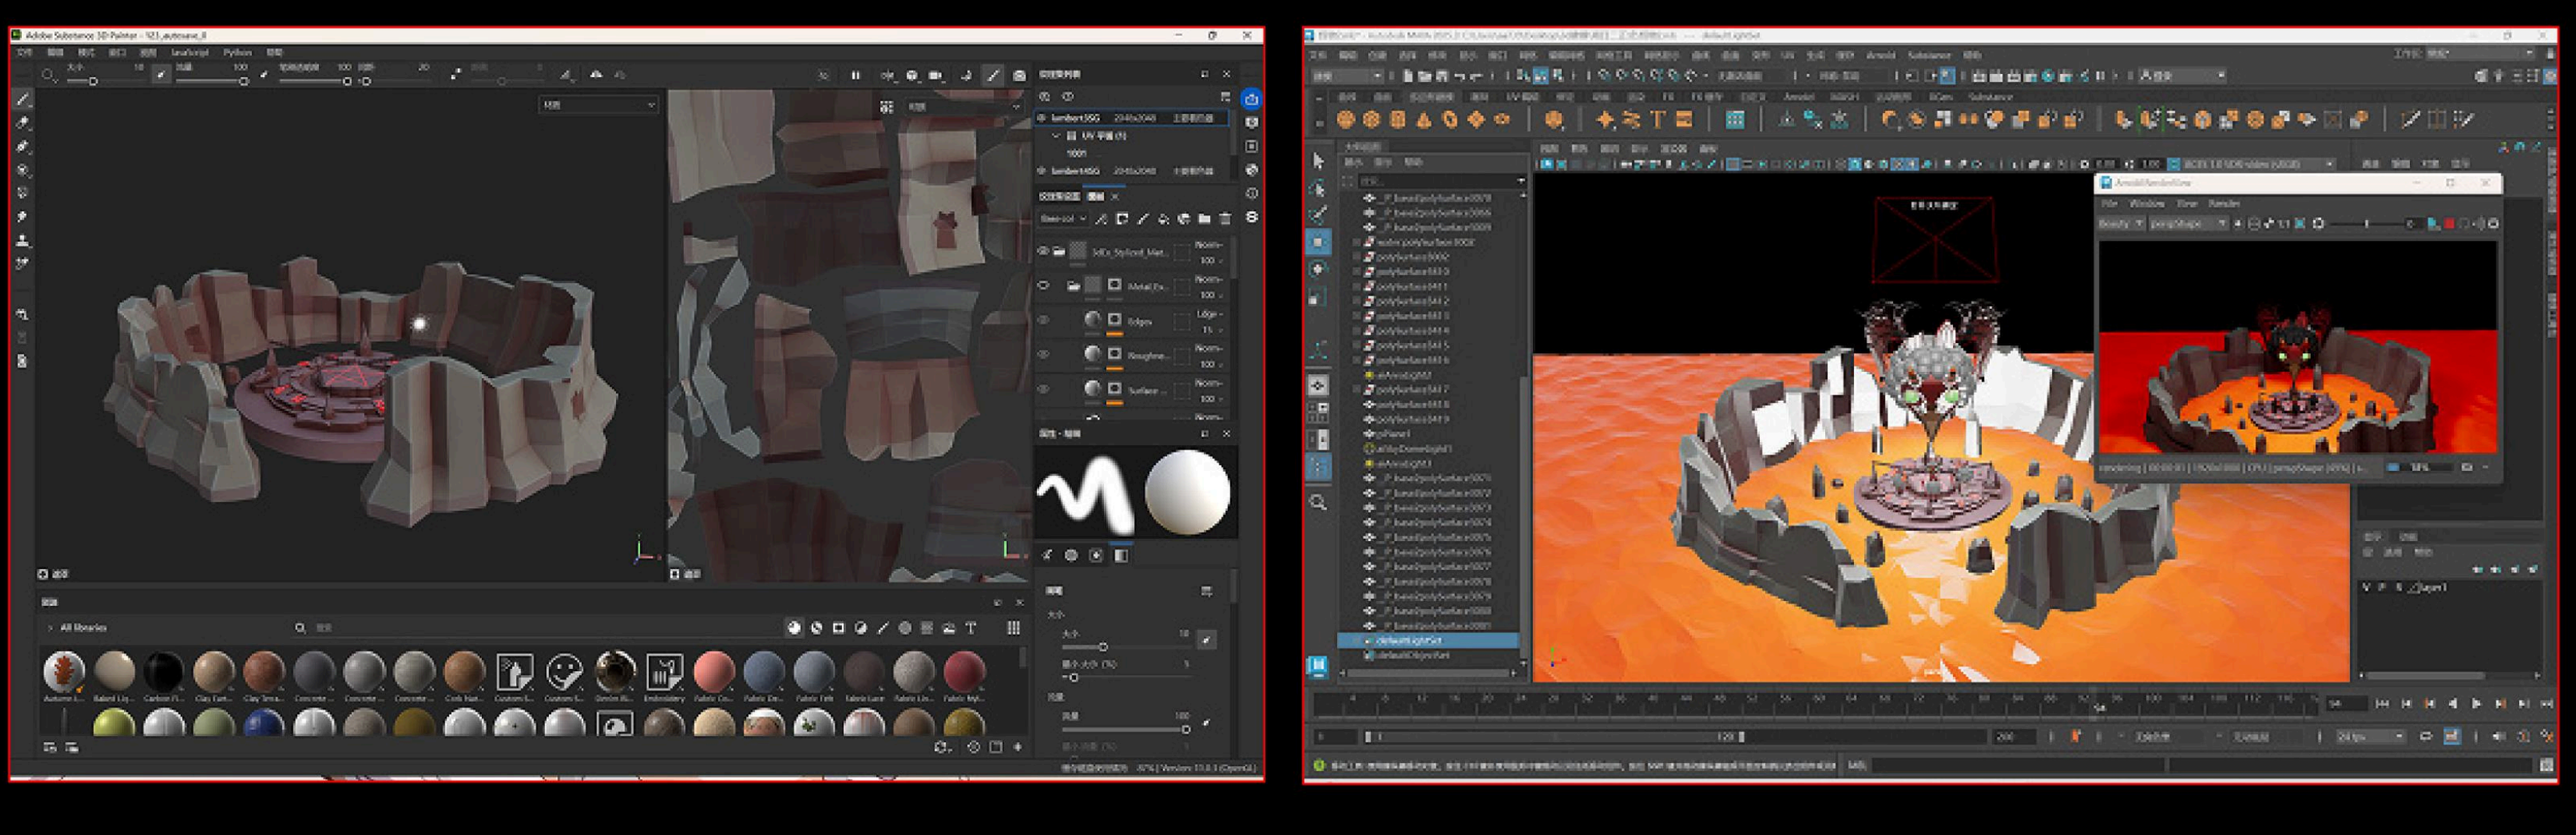
At this stage, I finalized the appearance of the character and began modeling and applying materials.

ENVIRONMENT PROCESS

REFERENCE LIST







Based on the reference, I built my own scene. I first constructed the scene in Maya, then applied materials in Substance Painter.
