Inspiration

color inspiration source

Due to my personal obsession with game design, I'm also deeply fascinated by firearms—especially futuristic weapon designs. Fueled by my passion for games like Valorant and Call of Duty, I integrated ideas from both titles along with concepts from other online concept art to create these two weapons: one is an electromagnetic sniper rifle with a replaceable high-power scope, and the other is a minimalist electromagnetic pistol.

color inspiration source :

Color Palette Inspiration: With clean white as the main color, paired with tech gray and accented with a few detail colors, it creates a cool and avant-garde futuristic vibe. My motivation for designing these weapons is to integrate and reshape the styles of my favorite game weapons. Through 3D modeling, I aim to materialize my imagination of future pistols and showcase the fusion of technology and firearms aesthetics.

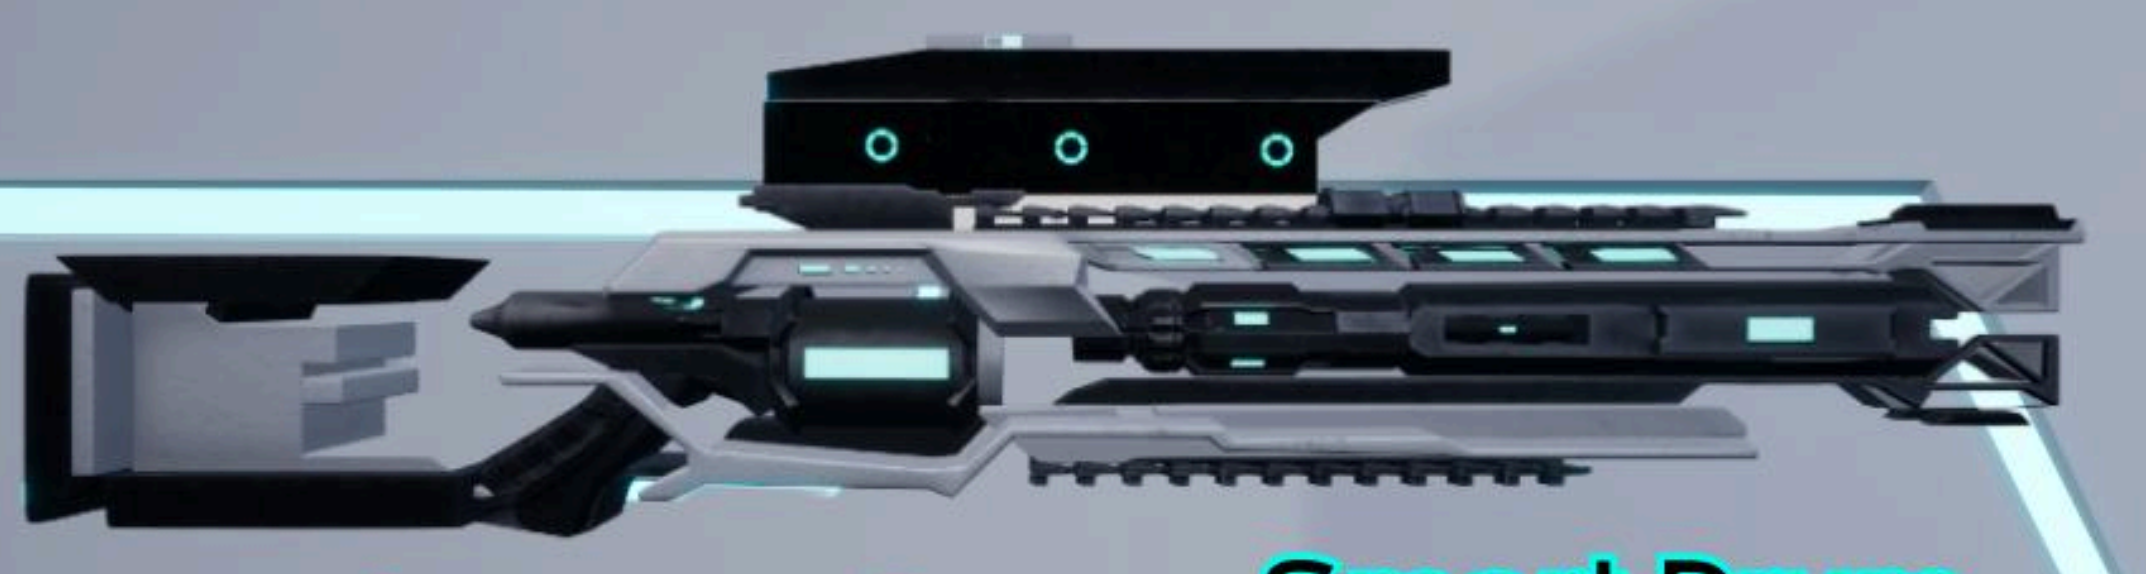
COLOR FROM:

Scene Source: I found a free asset pack in the Unreal Engine 5 Marketplace that perfectly matches my style. Leveraging these references, I created a new scene—a weapon display room—to complement the weapons I designed.

The new Technology

Stellar Dawn



Starburst Strike

Smart Drum Magazine

Electromagnetic Energy Cartridges

Rifle Scope

Pistol Sight

Powered by quantum technology and supported by an intelligent simulation system, the "Stellar Dawn" sniper rifle achieves precise long-range elimination beyond a kilometer through ultra-distance tracking. The "Stellar Flash" pistol, relying on a micro energy module, delivers instant close-quarters neutralization—both continuously serving as innovative firepower elites that redefine the battlefield.
