My name is Estelle (Yujia Jian), and I am writing to apply for the Game Art Design program. With a background in fashion communication and half a year of professional experience in IP character design, I have developed a strong interest in visual storytelling and creative world-building, which has ultimately led me to pursue further study in game art.

Outside of design, I am an avid animal lover-especially of cats-which often inspires the playful and organic elements in my personal artwork.
