ECHOES OF VALOR

The four protagonists were stationed in a camp at what should have been a peaceful time, but the sudden gunfire broke the peace.

The four protagonists and their teammates fought hard to hold their positions in the trenches in the first scene. In this defensive battle, the four protagonists lost a friend. But another comrade died.

In the final scene, the protagonist and his only friend came to the stage to be awarded the medvwal, but the cannon sound that should have been celebrating made the friend lose his reason and began to draw guns and shoot, and the protagonist had no choice but to kill his friend's life.

In the end, the protagonist could not bear the death of three friends and chose to commit suicide.

ECHOES OF VALOR
Inspiration

Overall source of inspiration

ECHOES OF VALOR draws inspiration from the harsh realism of This War of Mine and All Quiet on the Western Front, the intense trench and urban combat depicted in 1917 and Call of Duty: WWII, and the grounded themes of sacrifice and camaraderie found in Valiant Hearts and Saving Private Ryan. Told from the perspective of a single soldier, the game follows a straightforward arc—from an unexpected assault, to a desperate counterattack, to the final moment of "victory" on the podium. Yet despite completing the mission, all squad members are killed in action, and the protagonist, shattered by trauma and survivor's guilt, ultimately takes his own life. Through a pixel-art lens, the game portrays the heavy cost hidden behind the façade of triumph.

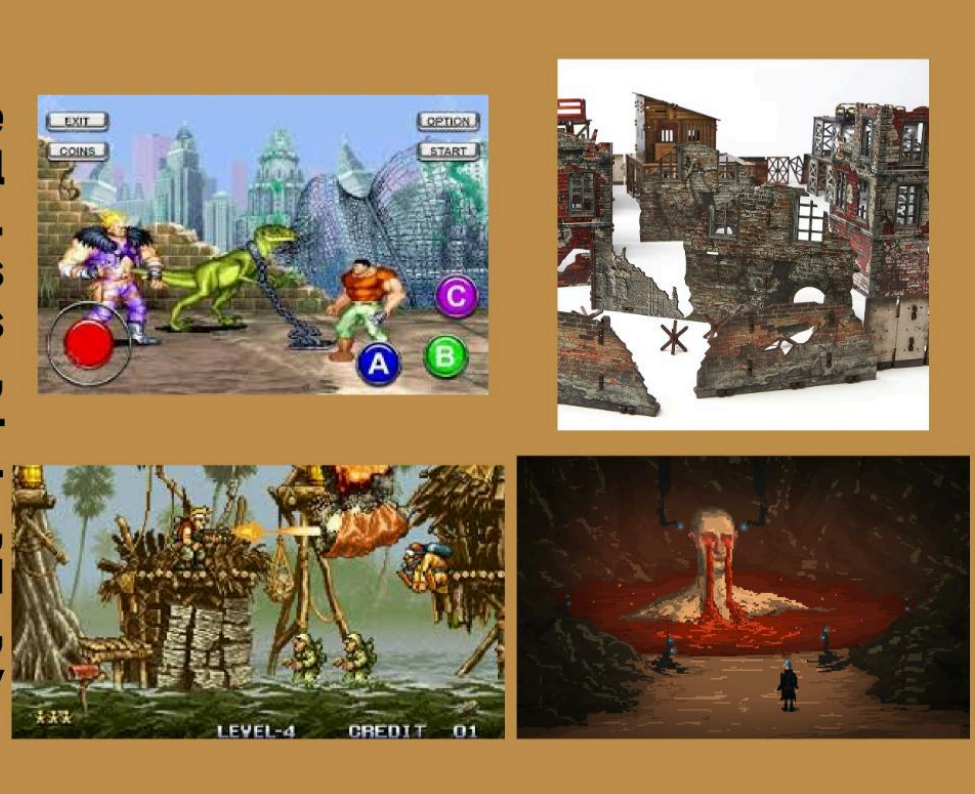
Visual and artistic inspiration

The art style of ECHOES OF VALOR draws from the scene composition and battlefield atmosphere of Metal Slug, without adopting its high-precision pixel detail. The background design references the layered layouts and hand-painted environmental approach of Cadillacs and Dinosaurs. Its overall tone incorporates the ruined, bleak, war-torn aesthetic found in "war remains"-style works, combined with the rough, dirty, and low-saturation pixel textures of Death Trash. Ultimately, the visual direction uses low-resolution, coarse-grained pixel art to portray the oppressive reality of trenches, towns, and the final podium, emphasizing the brutality and weight of war.



Psychology and trauma-related inspiration

The thematic core of ECHOES OF VALOR is inspired by a range of works that explore the psychological burden and lasting trauma of war. This War of Mine and Restrepo reveal the exhaustion, pressure, and vulnerability experienced by ordinary soldiers on the front lines, forming the foundation of the game's belief that even the most unremarkable individuals can be broken by conflict. Spec Ops: The Line provides the key concepts of survivor's guilt and the emotional collapse hidden behind a "successful mission," shaping the game's focus on the mental cost beneath apparent victory. The struggles depicted in American Sniper, Brothers, and Born on the Fourth of July—where veterans confront loss, numbness, and post-war despair—inspire the protagonist's breakdown after returning to safety. Meanwhile, First Blood reinforces the logic behind the shift from wartime composure to post-war collapse through its portrayal of long-term suppression and the sudden eruption of accumulated trauma. Together, these influences define the central theme of the game: the wounds left by war are not easily healed, triumph is often hollow, and the force that ultimately destroys a soldier is the silent damage carried within.

The privatized arm of a multinational pharmaceutical giant, testing biological weapons in the name of "environmental cleanup." They disguise abandoned facilities as quarantine zones, using genetically modified soldiers wearing neuro-suppressive armor to carry out their missions.

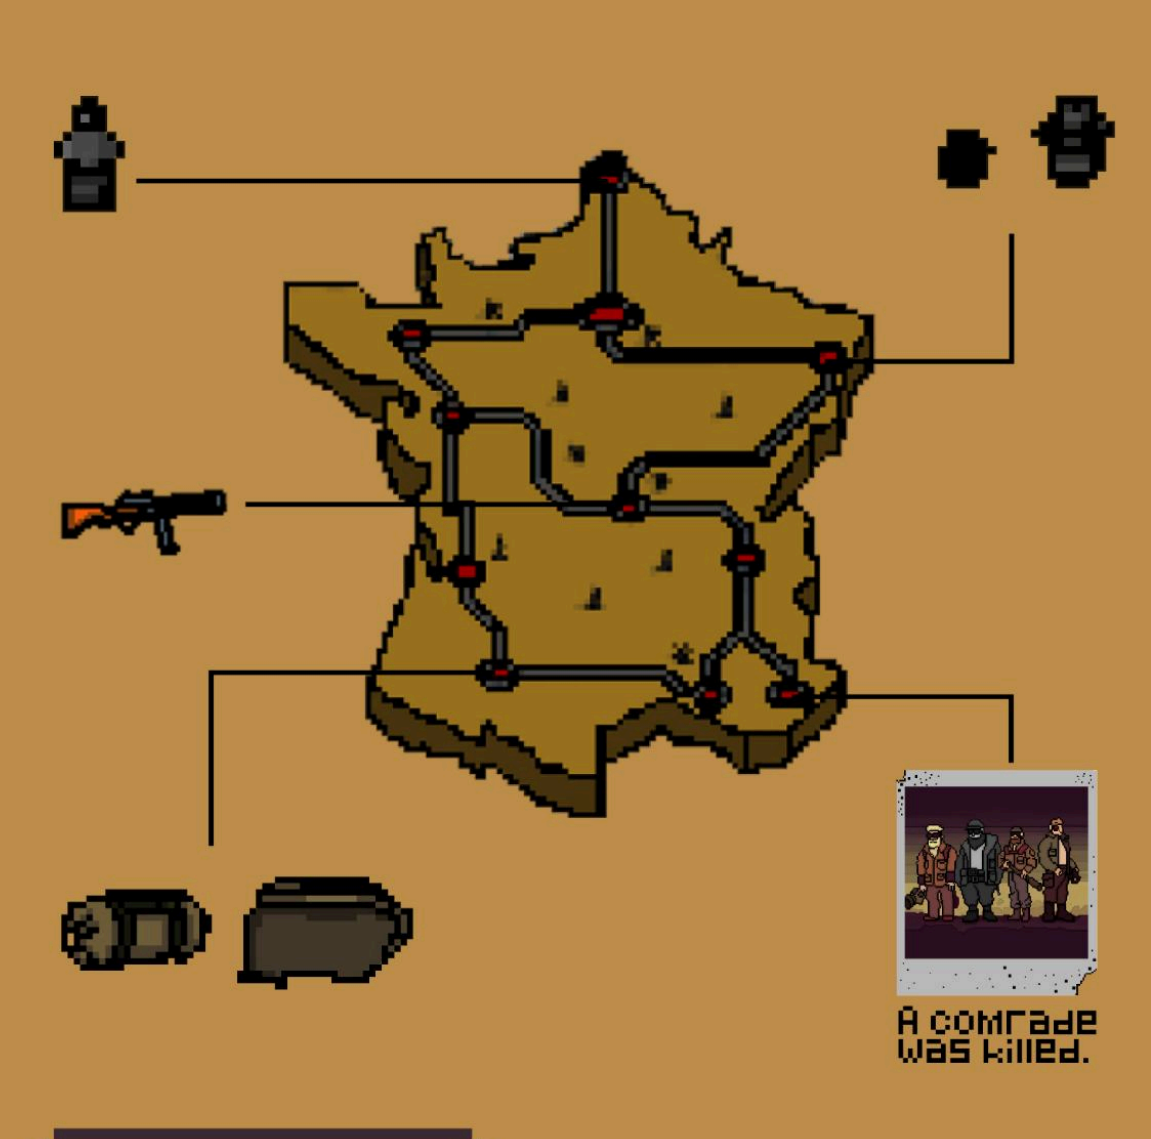
ECHOES OF VALOR
BACKGROUD AND INTRODUCTION

Basic game rules: players need to use bullets to kill the incoming enemy, and at the same time need to move to avoid the enemy's bullets, the gameplay is similar to superhot, when the player moves.

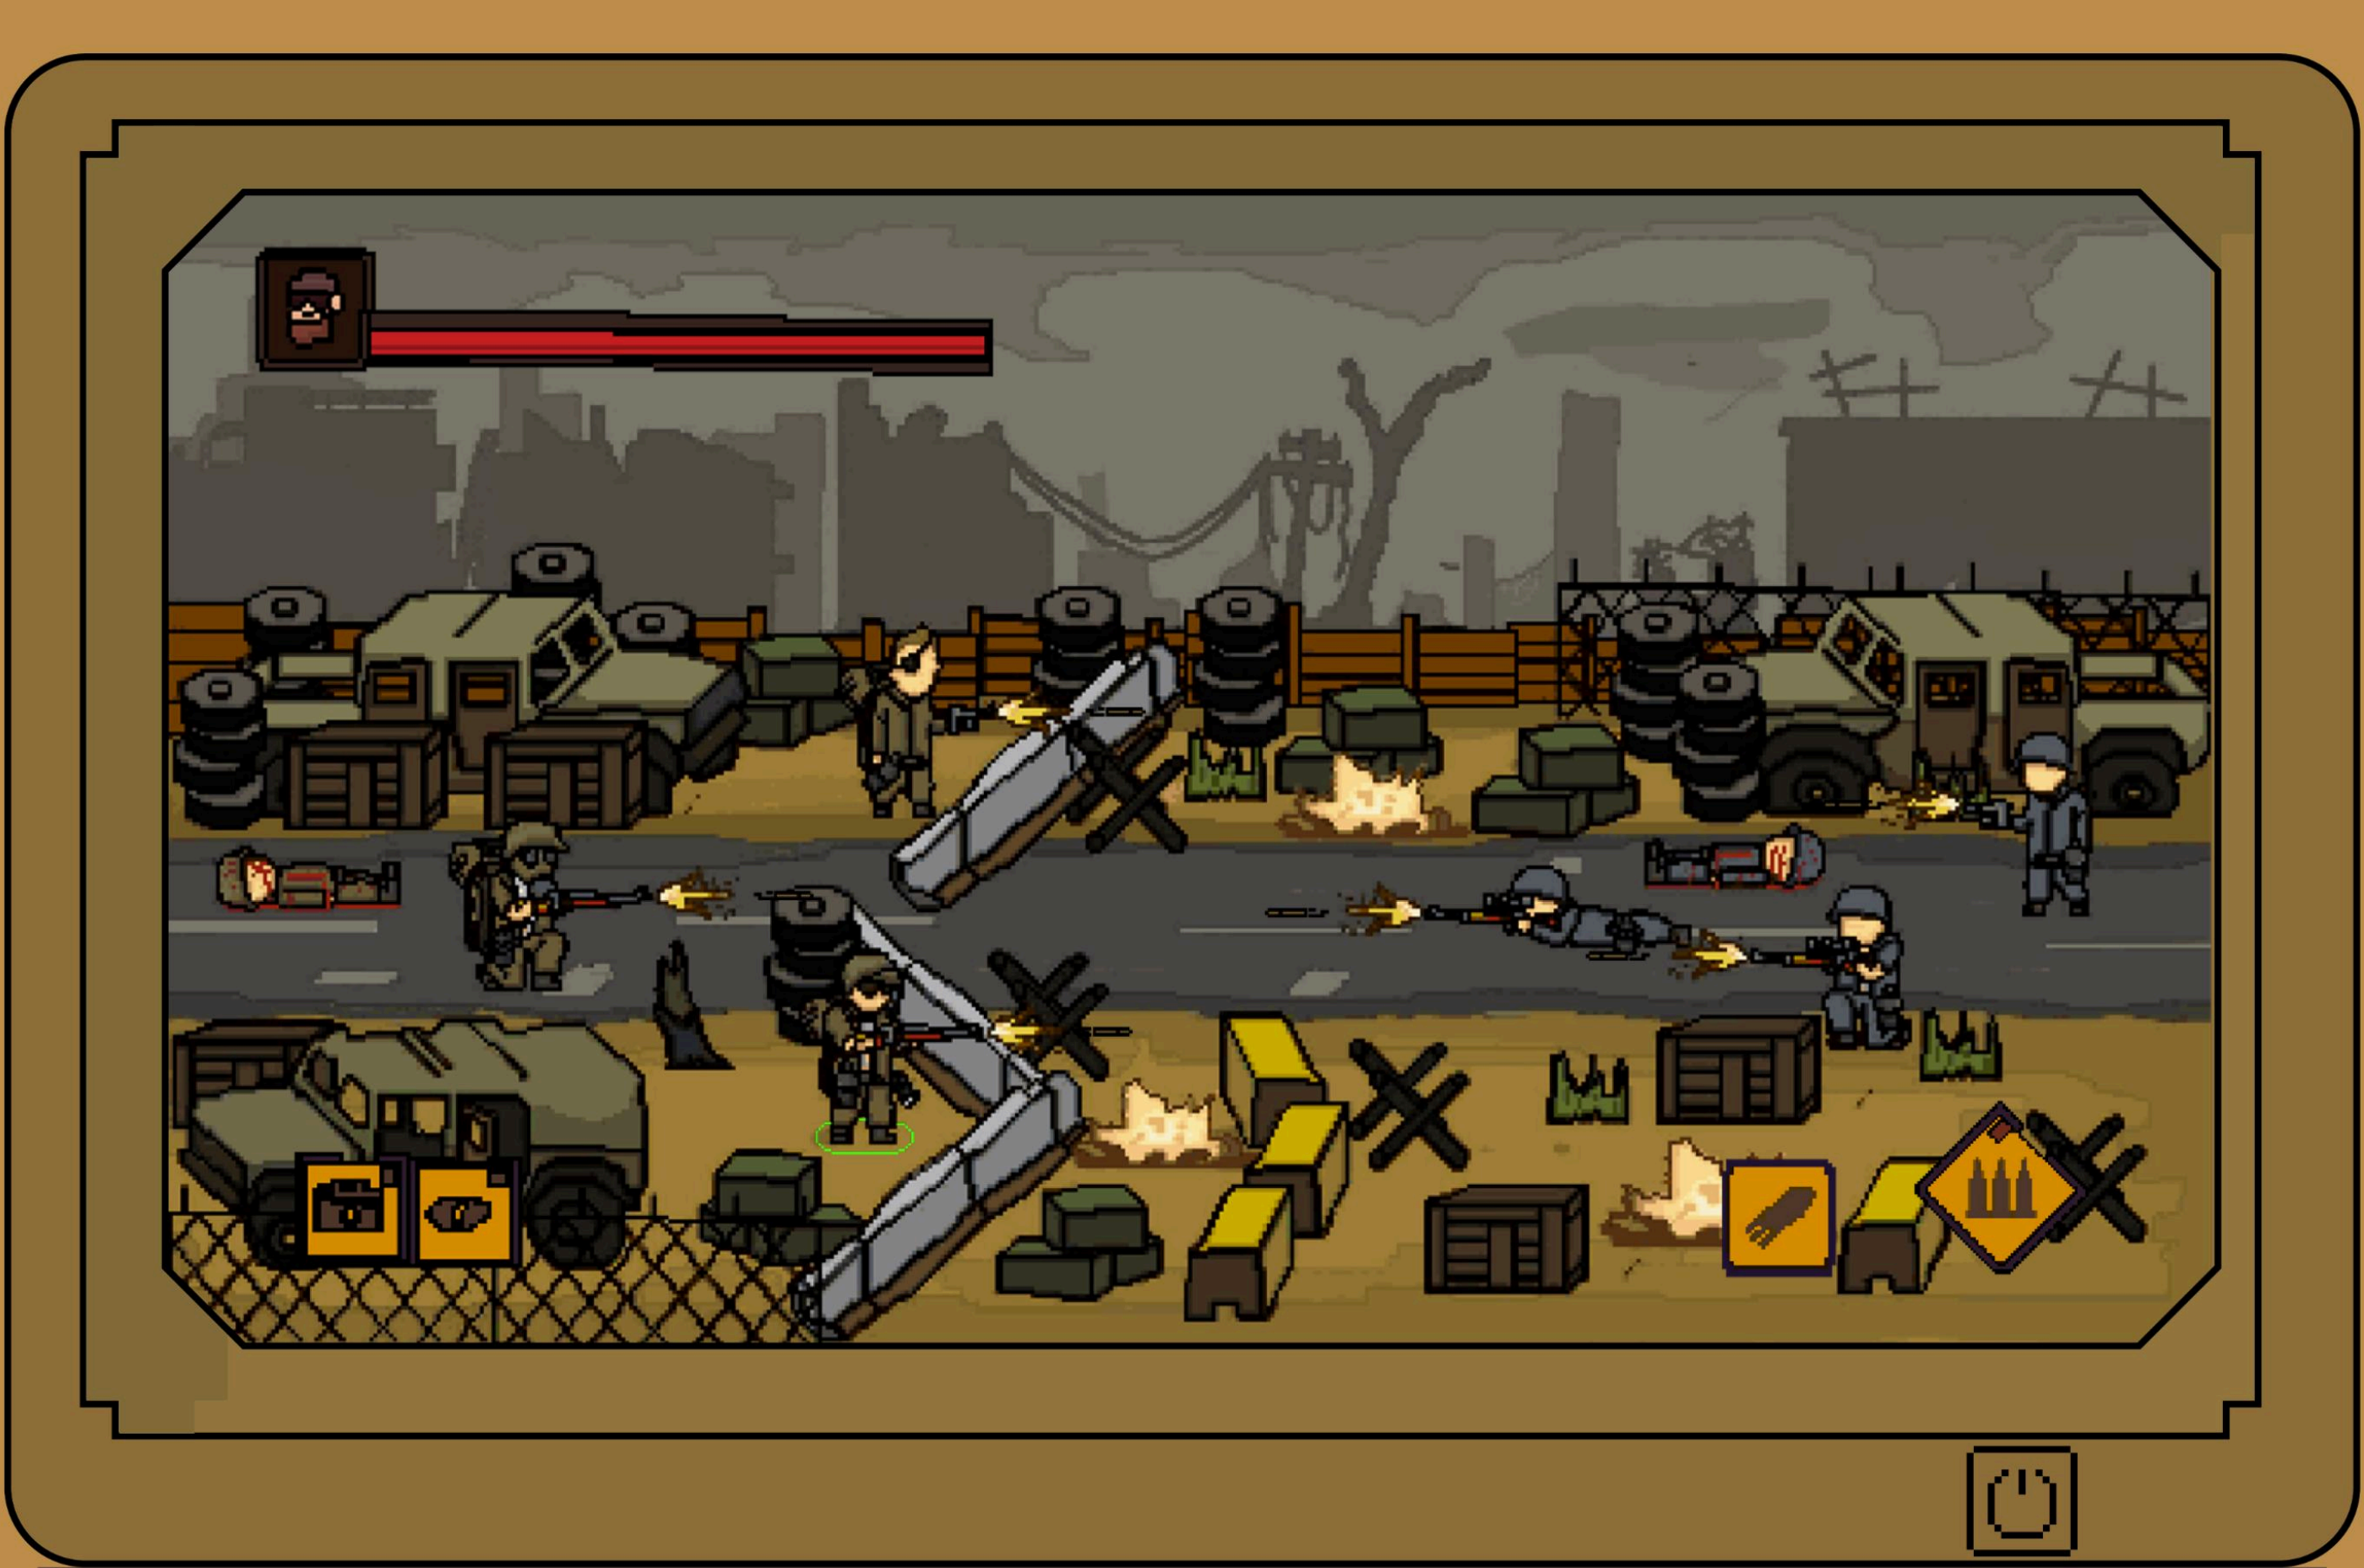
CAUSE OF CONFLICT OUTBREAK

Friendly forces accidentally intercepted enemy encrypted communications while patrolling the border and discovered that they were secretly deploying a new "neural jamming weapon" test site. The weapon can disable enemy electronics and induce soldiers to kill each other, and friendly forces decided to destroy the test site to stop the spread of the technology. However, the enemy was informed of the operation in advance through counter-intelligence means, disguised as friendly supply convoys to infiltrate the base, and launched a raid on the grounds of "preventing leaks".

ECHOES OF VALOR
SCENARIO ONE

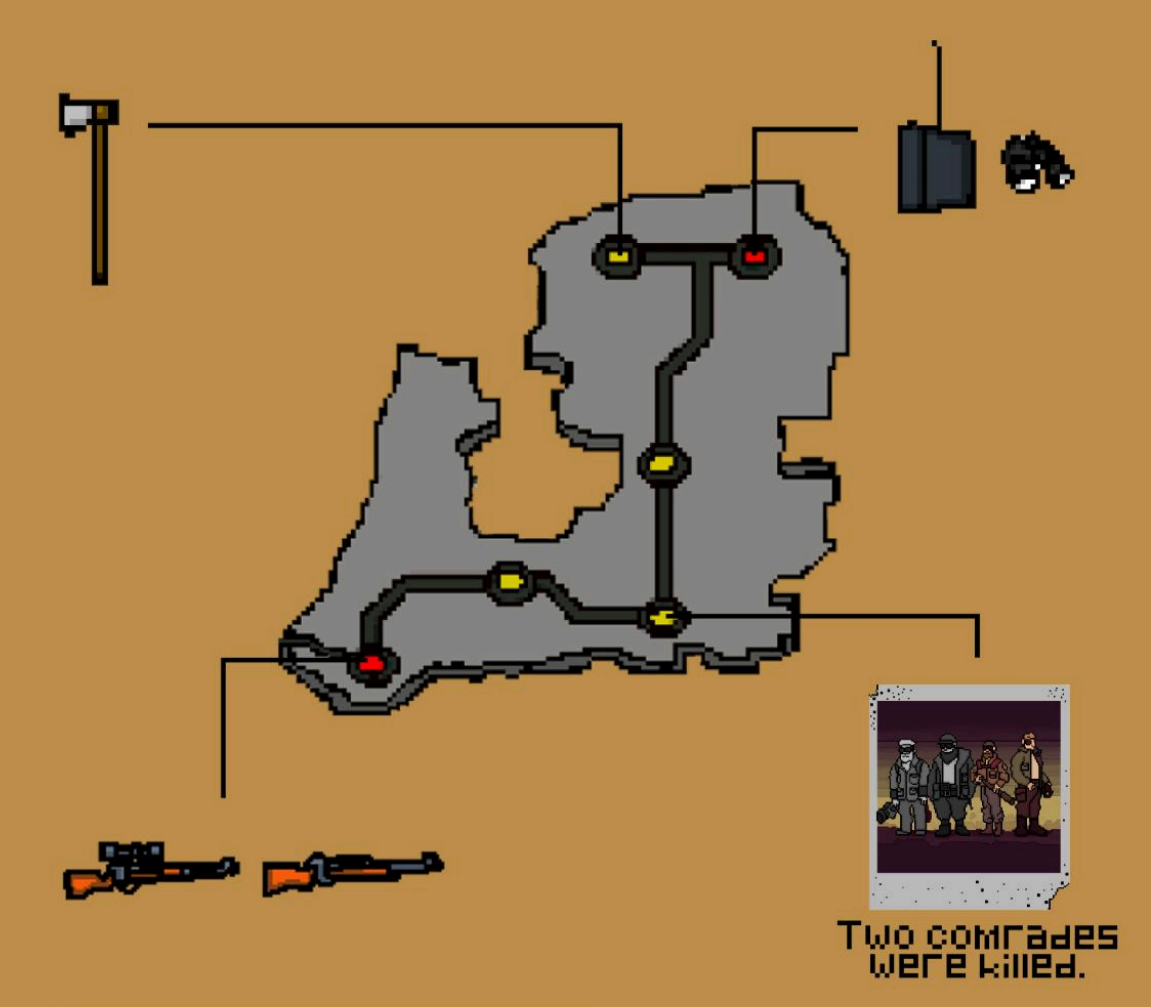


SCENE ONE ITEMS

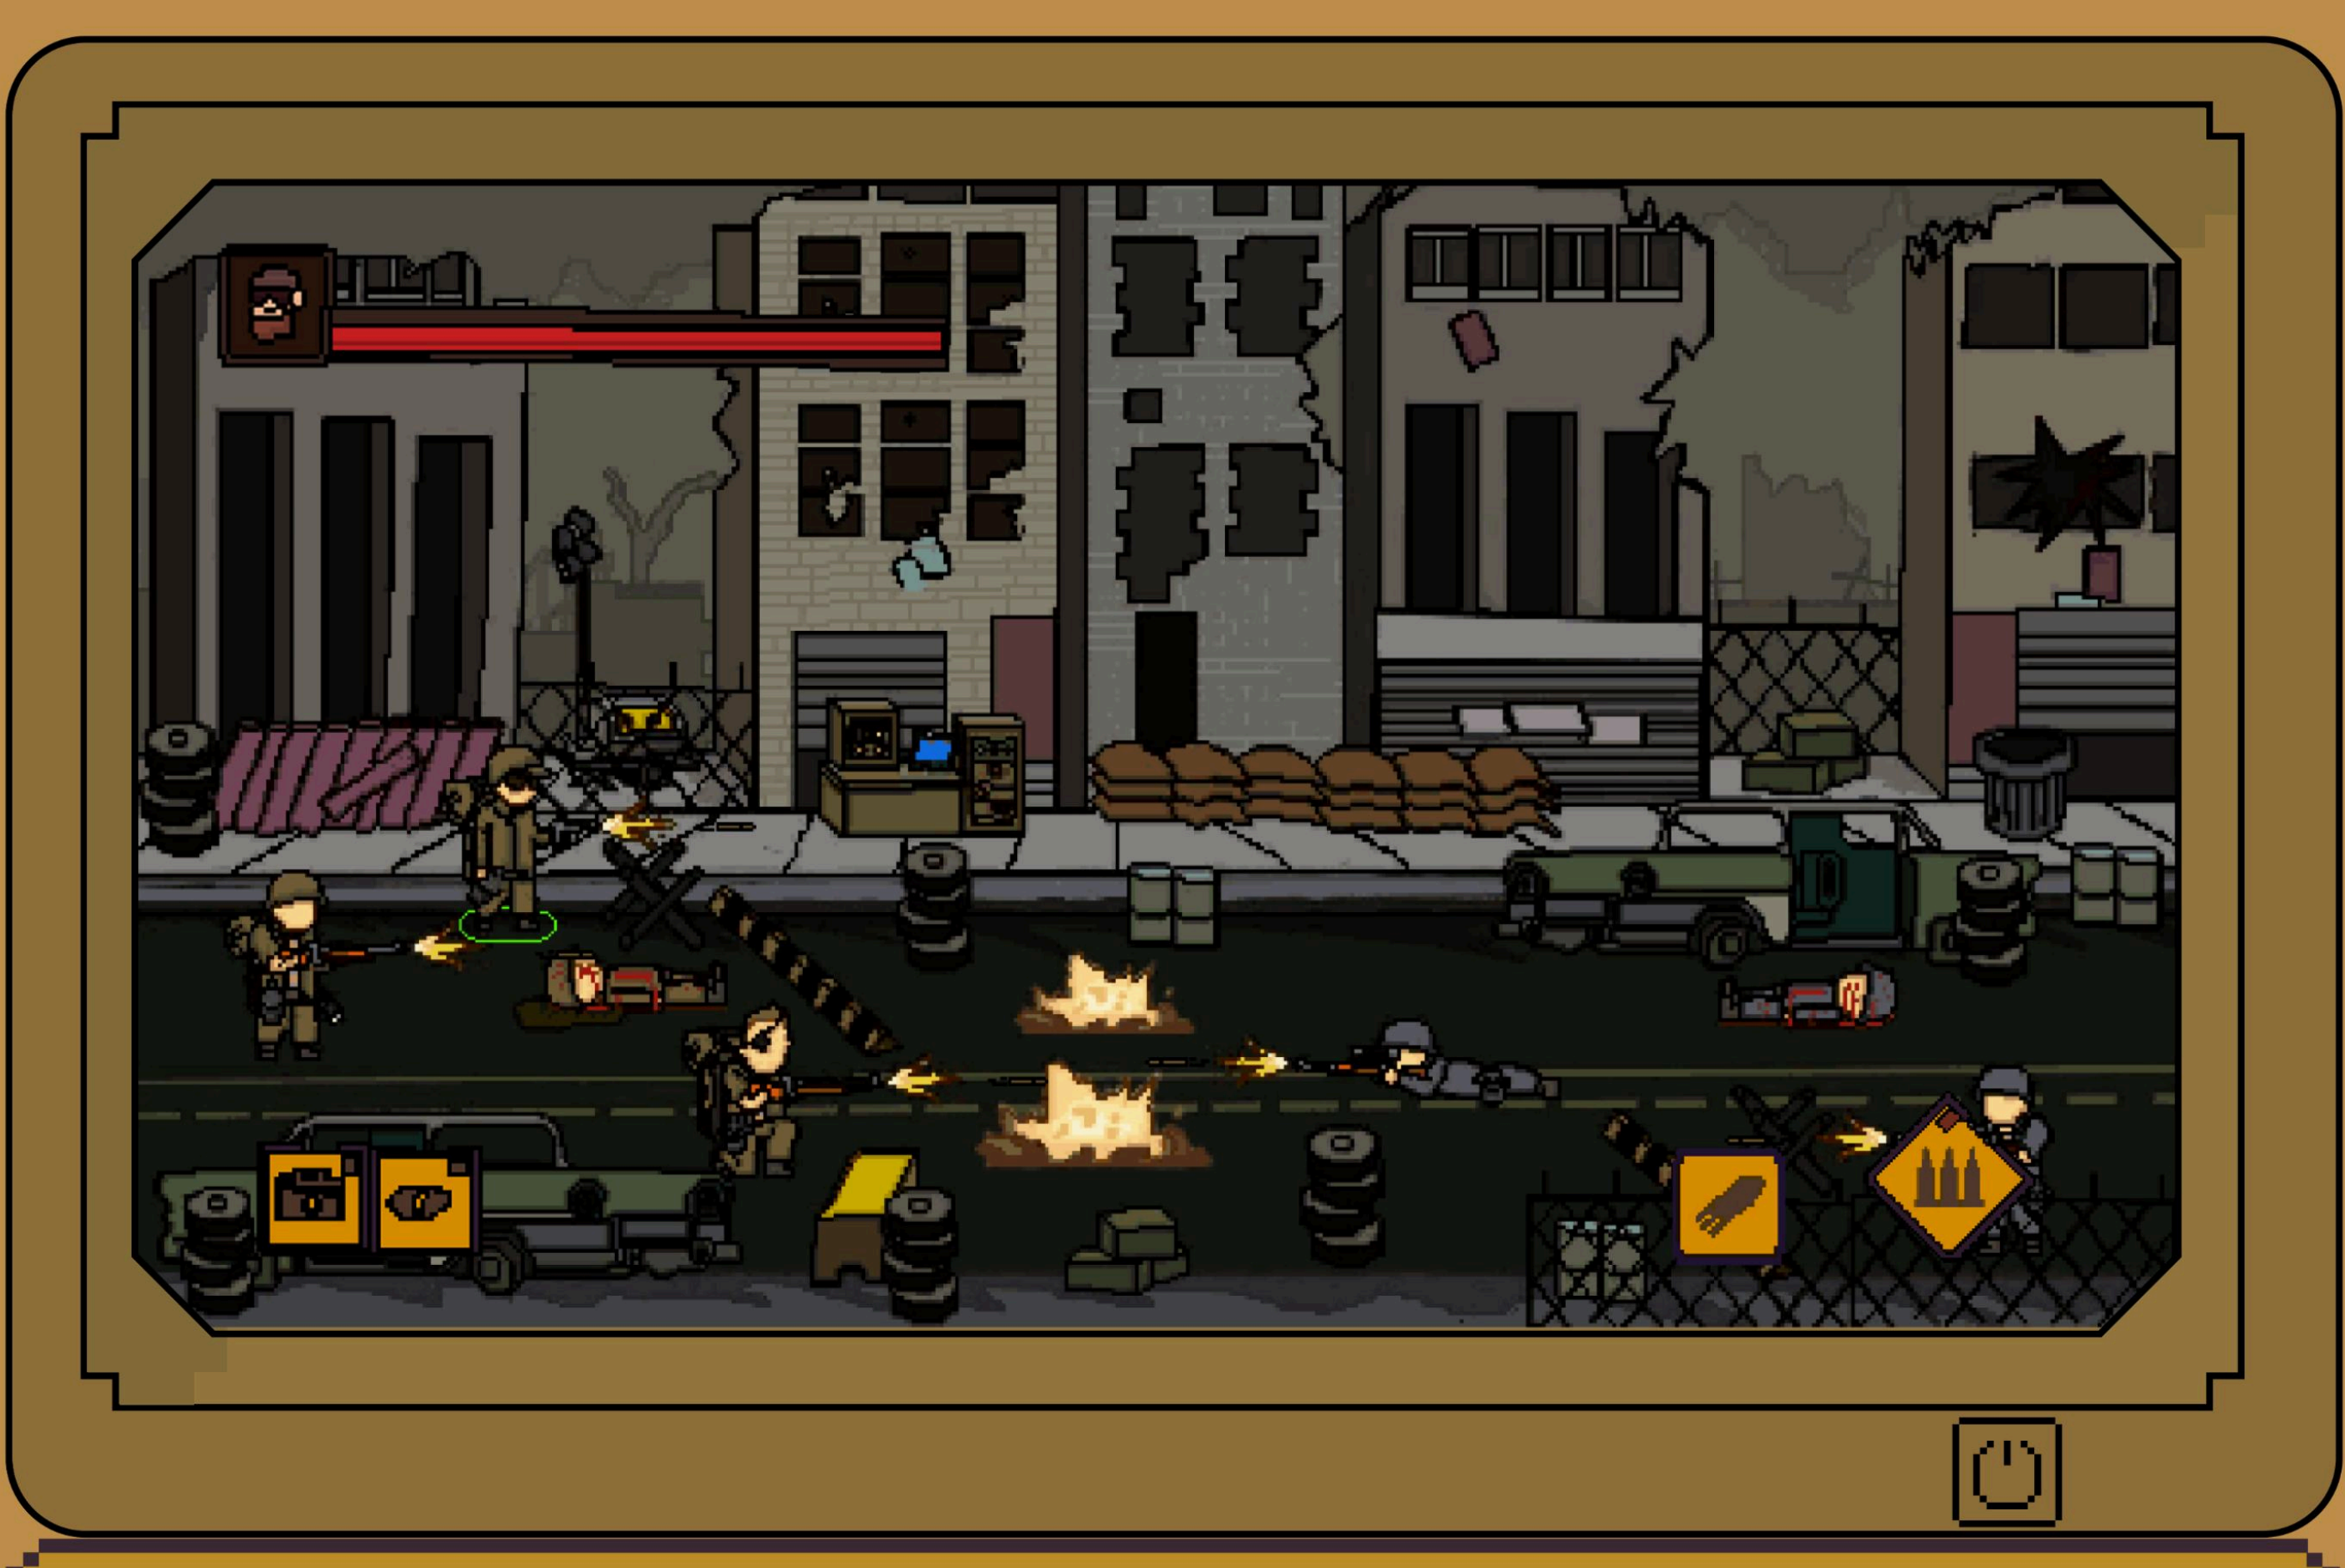


The four protagonists were stationed in a camp at what should have been a peaceful time, and the sudden gunfire broke the silence. The four protagonists and their teammates were ordered to defend their positions, and they fought hard to hold their positions in the trenches, but in this defensive battle, the four protagonists lost a friend

ECHOES OF VALOR
SCENARIO TWO

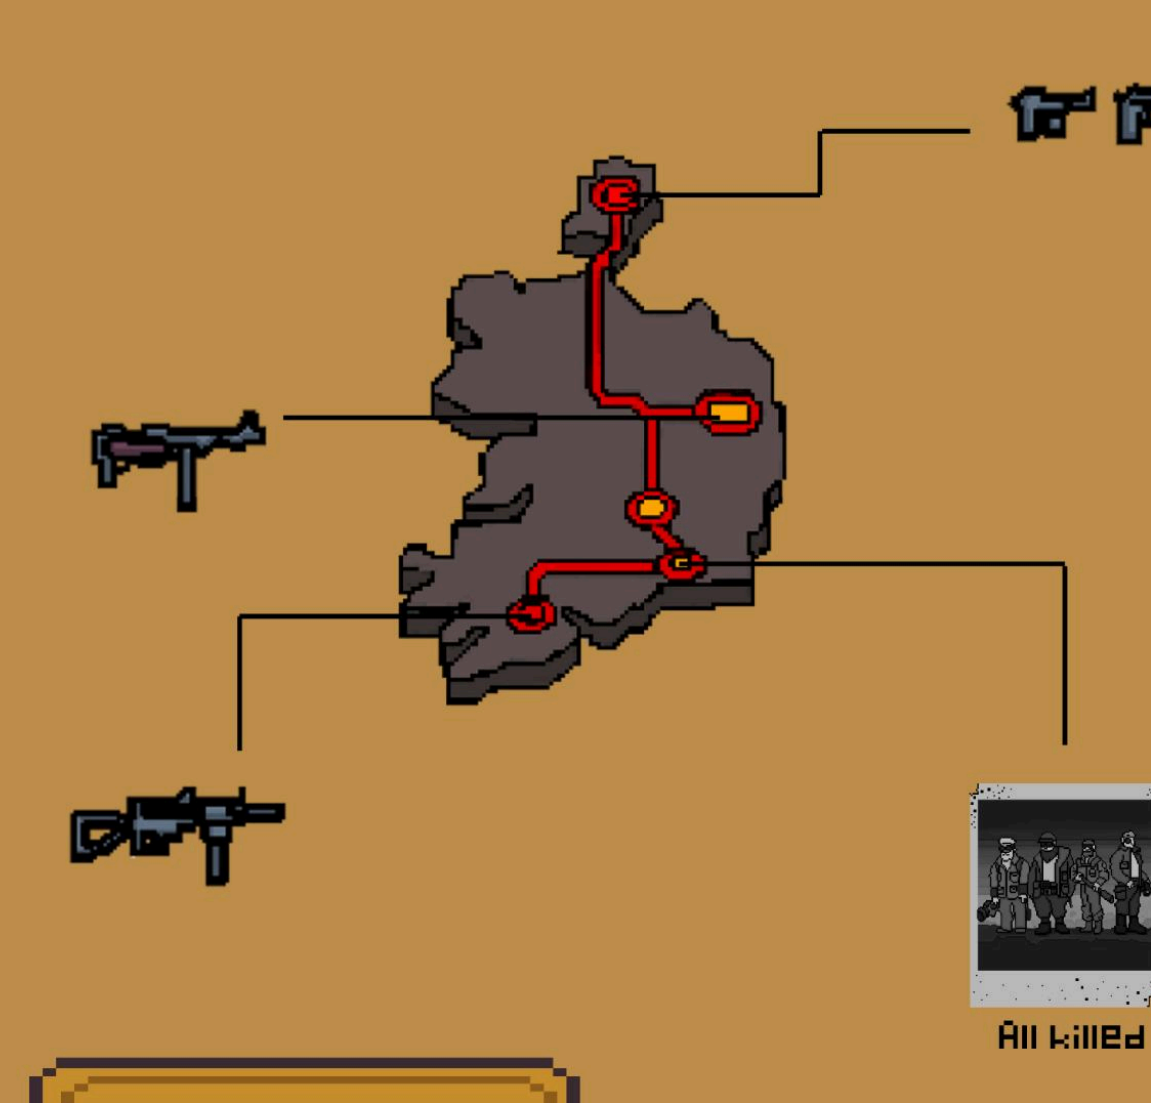


SCENARIO TWO ITEMS

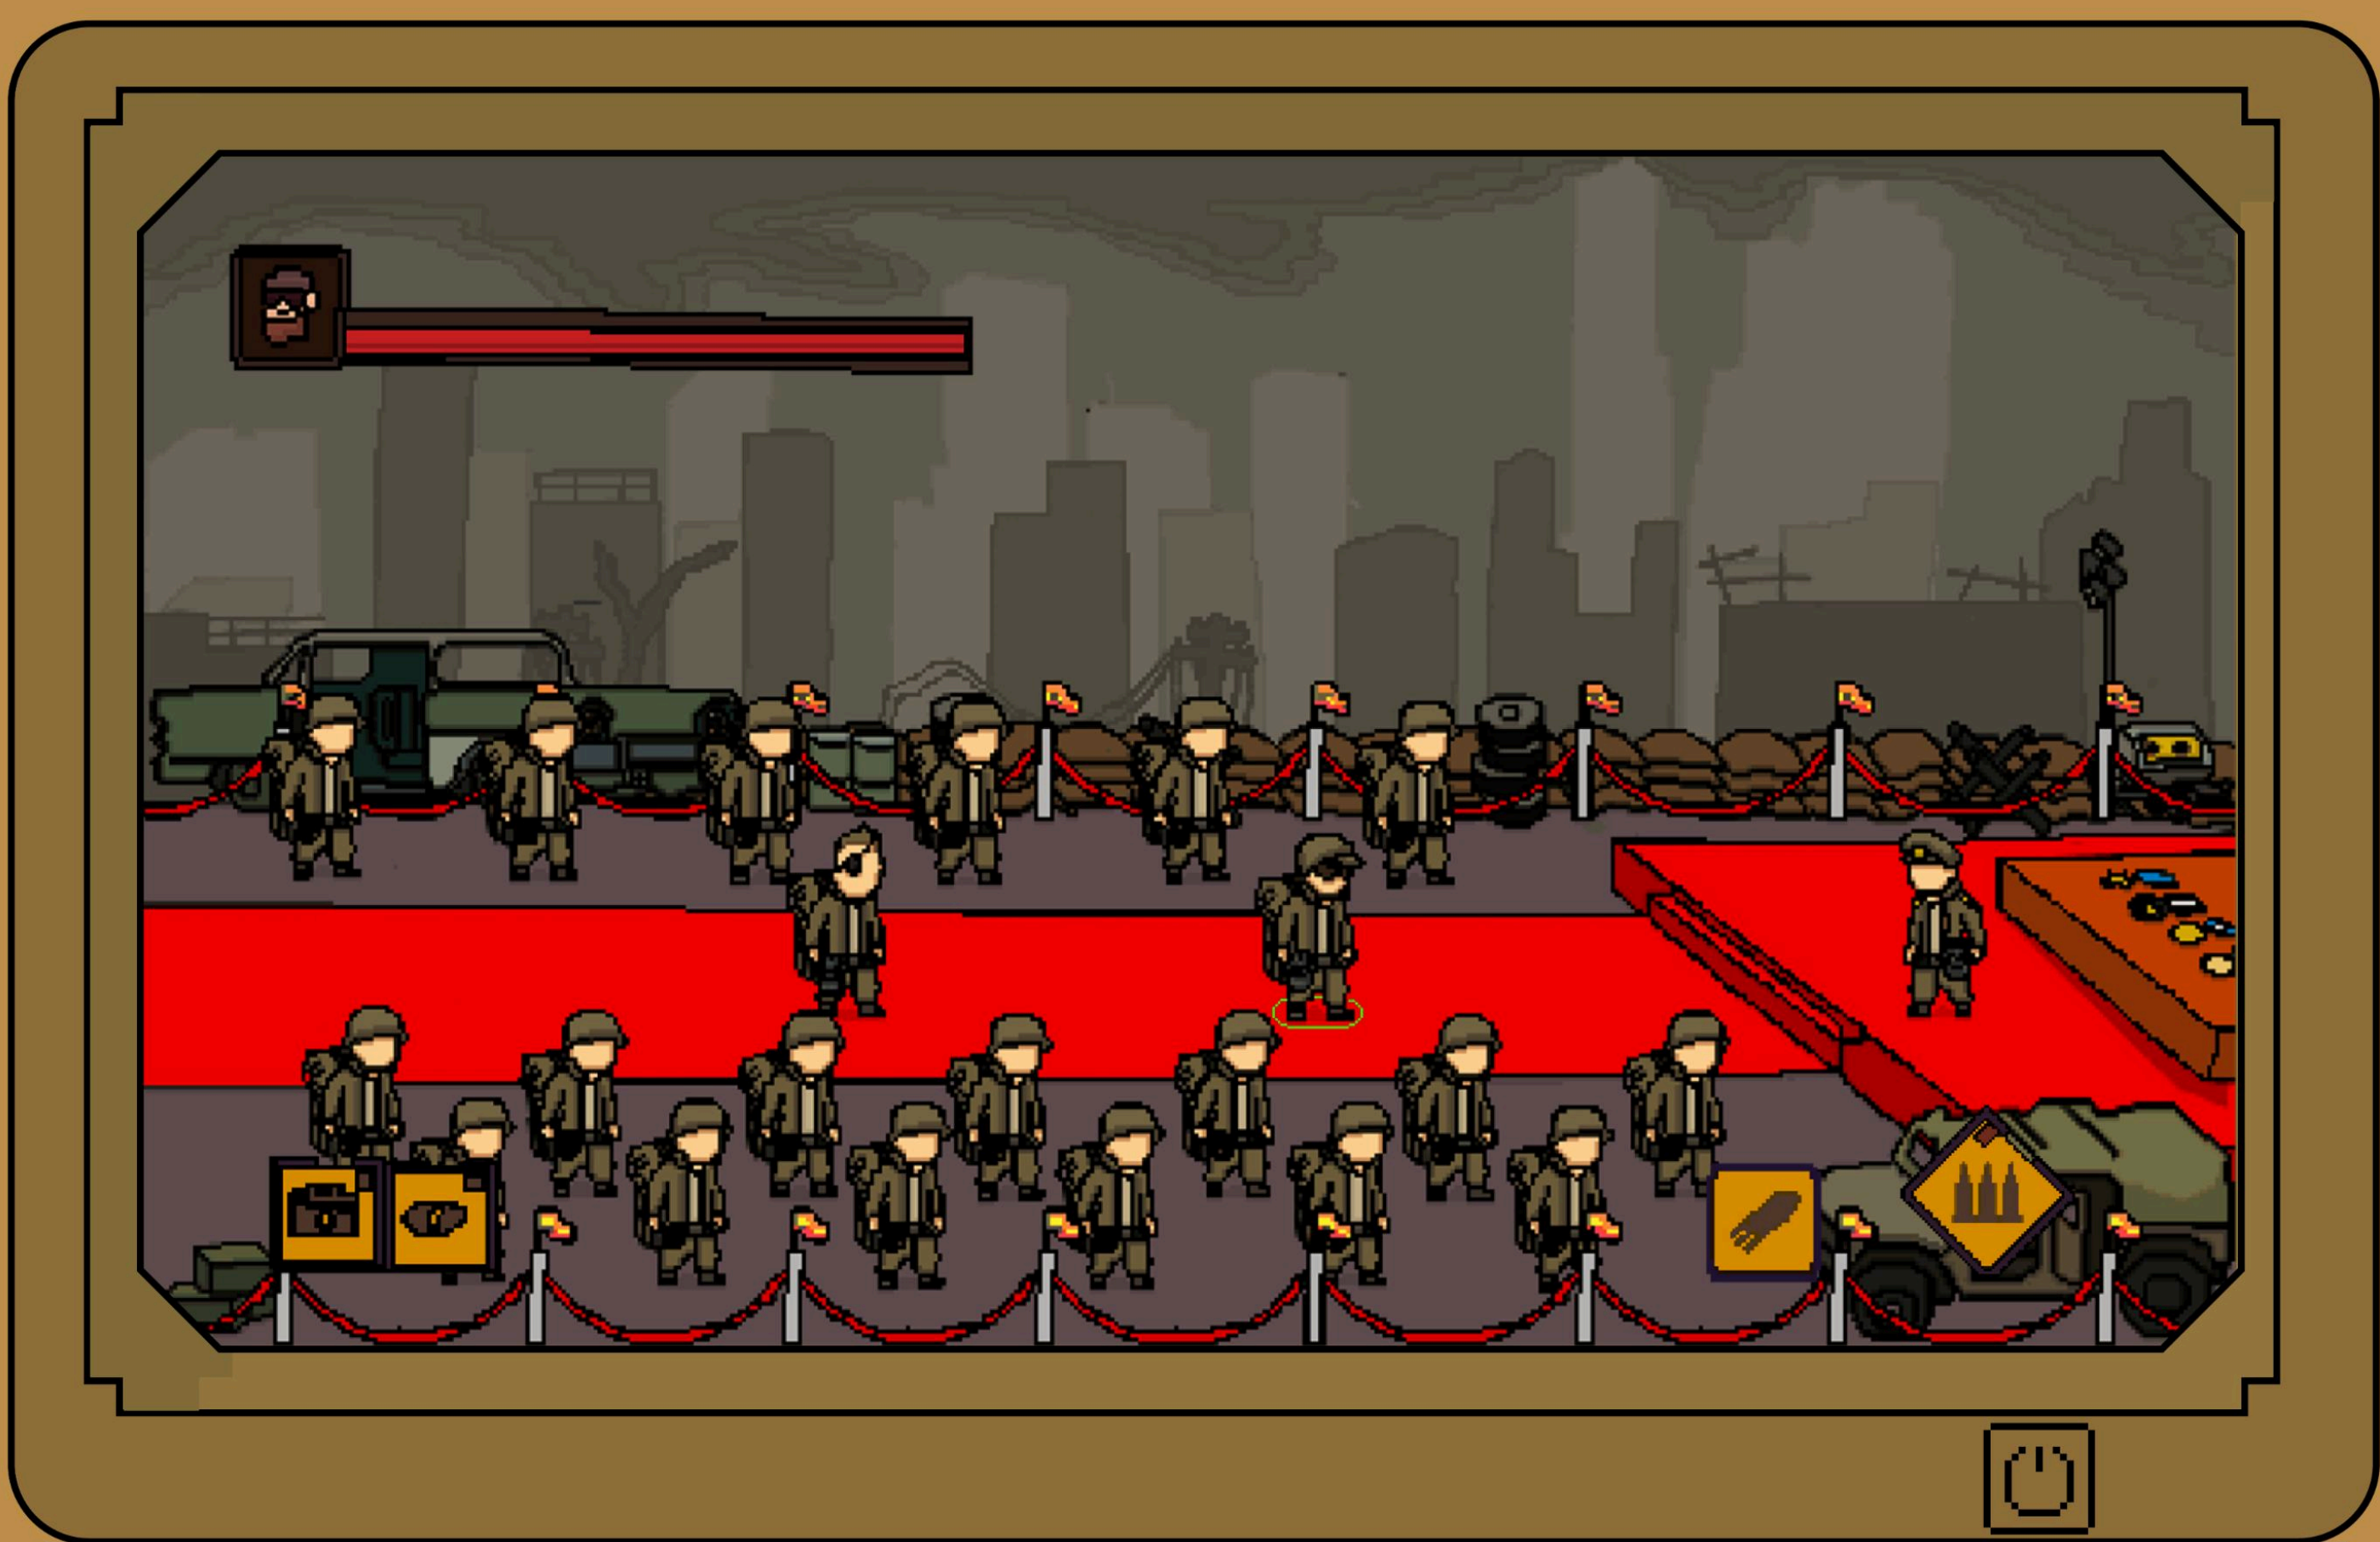


In the next counterattack, the three protagonists led their teammates to attack the enemy city and successfully captured the city, but another comrade died.

ECHOES OF VALOR
SCENARIO THREE



SCENARIO THREE ITEMS



In the final scene, the protagonist and his only friend came to the stage to be awarded the medal, but the cannon sound that should have been celebrating made the friend lose his reason and began to draw guns and shoot, and the protagonist had no choice but to kill his friend's life. In the end, the protagonist could not bear the death of three friends and chose to commit suicide.
