Personal school project 1

Champion Pizza brand identity design

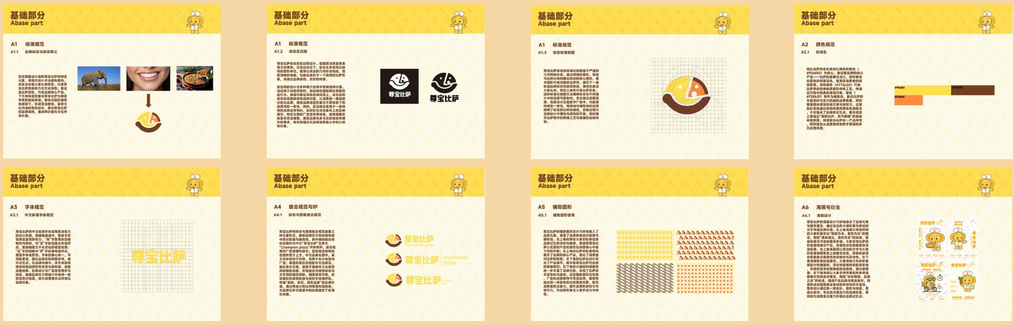

Superior materials and meticulous craftsmanship, the choice of quality

VI manual

A VI manual (Visual Identity Manual) is a document that defines and explains a brand's visual identity system. It includes rules and guidelines for using the logo, colors, typography, layout, and other visual elements. Its purpose is to ensure consistency in all brand-related materials and maintain a unified brand image.

Posters and display boards

Posters

Display boards

I created four posters that follow the brand concept and integrate it into the visuals. The posters use a cute and appealing style to attract customers and include related visual elements to enrich the overall presentation. I also designed a set of visual display boards that showcase all key visual elements, including typography design, logo design, and other components of the brand identity system.

Mockup display
